^ ^ ^ Organic waste from our sites is taken to the organic waste management facility of the larger development. Measurement of waste is done at the facility along with waste from of the residents already living in the development. Therefore break up of waste from our sites is not available, we are in the process of incorporating a mechanism to start measuring this at source.

After a thorough examination of the project's activities, the major types of wastes to be expected are determined. The type and quantity of waste generated are segregated and kept in designated yards according to waste classes. Prior to disposal, consideration for reuse or recycling is considered, depending on the qualities of the waste. If any waste needs to be treated before being disposed of, it is given to an approved vendor.
