Yes

**5. Describe the internal mechanisms in place to redress grievances related to human rights issues.**

The Company has established a Vigil Mechanism (Ombuds & Open Reporting Procedure) through our Open Reporting channels which serve as a critical mechanism for individuals to safeguard their rights and raise concerns or grievances. We believe in providing a trustworthy and transparent process for concern raisers which helps ensure and maintain an ethical, reliable, and effective Open Reporting system. Our general philosophy is that we do not need concern raisers to be certain that a violation of a policy or rights has occurred, but rather, the concern should be raised when there is a good faith belief that a violation of law or policy has occurred. Our Open Reporting channels serve as our grievance mechanism process where anyone- employees, contractors, supplier workers, community members, and other stakeholders – can raise concerns on any known or suspected violations of GE Vernova policy, law, or regulation. Concerns can be submitted anonymously where the Open Reporting program serves as a safe forum for whistleblowers, as we understand it can be difficult for some employees to come forward with their concerns.

If, at the conclusion of the investigation it is found that a violation has occurred, corrective action commensurate with the nature of the violation is taken.
