In line with this vision, we are consistently enhancing our environmental initiatives, some of which are:

- We closely monitor our operations to ensure adherence to environmental compliances and permissible limits and valid licenses
- We undertook benchmark assessment exercise against global players in apparel, leading companies in sustainability space and also government regulations to determine the need for strengthening current missions and thereby ensure complete adherence to the policy. Insights from the analysis helped us in strategising in line with global trends
- This year, we have refreshed our Enterprise Risk Management (ERM) framework to better understand ESG-related shifts, impacts and dependencies that may affect our ability to achieve the desired objectives. This exercise has contributed in emphasising our efforts in governance of sustainability risks including climate change across our operations and also align ourselves

with global framework and standards. One of the key objectives of the project is to build resilience against emerging sustainability risks like climate change based on the inputs from the Intergovernmental Panel on Climate Change (IPCC), COP26 and other global frameworks. This rigorous assessment not only helped us in enhancing climate change at ERM level but also complimented us in aligning the journey in accordance with Task Force on Climate-Related Financial Disclosures (TCFD)

Collaboration and co-creation for over a decade has helped us achieve new peaks and remain ahead of the curve in the industry. With 2030 in timeframe, we are accelerating advocacy and exploring innovative solutions with prime focus on circularity, sustainable sourcing and low carbon pathway. This journey requires deep collaboration and radical transformation across the entire value chain to benefit the ecosystem.
