Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk / opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate the positive / negative implications)
Right of way and land availability	Risk	Land Procurement is an essential step for setting up renewable business in compliance with legal and social regulations. The type of land acquired by AGEL is either Government or Private depending on the availability of wasteland, avoiding resettling of communities as well as preventing nearness of transmission of solar radiation.	In order to establish Right of way, AGEL signs an agreement of easement with land owners to secure land ownership in areas that fall in close vicinity to the project site to allow construction of approach roads and main road for the commute.	negative

Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk / opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate the positive / negative implications)
Climate change	Risk	Severe weather events are a risk to our operations and asset management along with internal as well as external stakeholders. Climate risk is material to customers, investors, and employees too. Responding to these concerns has become central to stakeholder understanding of climate-related risk to the company.	As a leader in renewable and green energy, we prioritize that every action of ours follows the principle of sustainable development.	negative
Asset management	Opportunity	Asset management helps AGEL in keeping track of all our assets and investments. Keeping account of the assets helps streamline our operations, especially in relation to sale or disposal. Our asset management systems and processes, and project tracking and control mechanism enable us to detect any slippages and identify value accretion opportunities within the project timeline.		negative
Business continuity	Risk	Prevention and recovery from potential threats such as natural disasters or disruption in operation due to technical failure are crucial to us	A business continuity plan is designed to protect our personnel and assets and make sure they can function quickly when disaster strikes. It is material to us as it reduces cost and duration of any disruption, mitigates risk and financial exposure, builds customer confidence, and safeguards our reputation.	negative
Safety and security (public)	Risk	The construction phase activities such as the piling of solar panels and erection of the WTGs, construction of the transmission line and substation and movement of material and personnel may result in impacts on the health and safety of the community. The operation phase activities include the accidental impacts-blade throw and Natural Disasters.	We adhere to stringent safety and security compliance measures so that we do not pose risk to the general public at our operation sites.	negative

Governance, leadership and oversight

7 Statement by director responsible for the business responsibility report, highlighting ESG related challenges, targets and achievements

The Adani Group's purpose of Nation Building provides a guiding framework for investment in businesses that accelerate India's economic growth, which is vital for the wellbeing of its citizen. The Group strongly believes that embedding Environmental, Social, and Governance (ESG) principles in its business operations is not only a responsibility but an essential part of our DNA. Adherence to these principles helps build resilience, transform culture and long-term value creation to systematically identify opportunities,

manage risks, and secure the interest of all our stakeholders. As a part of our vision to lead the sustainable energy future, we are committed to providing an ecologically leading solution to climate change, water scarcity and the unsustainable growing consumption of natural resources. While climate change has been an important driver for renewable energy adoption, water availability provides an additional impetus. By generating clean electricity with no emissions and virtually negligible water consumption in comparison to business as usual, we are enabling customers to decouple their own business growth from environmental impacts. We support efforts to shift to zero carbon grids while aligning

our goals with our customer's decarbonization commitments.

2 a. Does the entity have procedures in place for sustainable sourcing? (Yes/No)

Yes, The Company has a Suppliers' Code of Conduct stating specific expectations for engaging with suppliers. Here, "supplier" refers to material suppliers/service providers/vendors/traders/agents/ consultants/ contractors/third parties including their employees, agents, and other representatives, who have a business relationship with and provide, sell, seek to sell, any kinds of goods or services to the Company or any of its subsidiaries and associated entities.

The Suppliers' Code of Conduct facilitates collaboration with our suppliers in the promotion of professional and fair business practices that integrates respect of human rights, business ethics and environment. Our objective is to ensure that we minimize our potential impacts on people and on the environment, and that we manage business and reputation risks while capitalizing on opportunities. For example, we make efforts to source supplies and services from local sources where possible. We also organize various capacity building programs for our value chain partners.

Typical sustainability assessment of critical suppliers includes questions and performance on the following:

Environment

Environment Management certification; Energy Management certification; Scope 1 and Scope 2 GHG emissions; notice / penalties; pollution; energy consumption; water conservation; packaging; land conservation; air emission; hazardous waste and other certifications

Social

Human Rights Policy; POSH provisions; Child Labor Policy; social accountability certification; medical fitness checks; compensation laws; Employee Policies; CSR Policy; Health & Safety Policy; external certifications; safety performance

Governance

Board Diversity Policy; code of conduct; Whistle Blower Policy; information security certification; ESG reporting; other policies; licenses; women representation; notice / penalty; financial strength – auditing and reporting

We have identified the following ESG and Sustainability risks in the supply chain and are working on the risk mitigation measures:

- High risk-based on Geo-political Risk and possible increase in import duties
- Human Rights Violations controversies in media

Availability of Raw Materials in the long-term:

We have identified five tier-1 suppliers as critical suppliers based on the critical components (solar panels, wind turbine generators etc.). They contribute to 75% of the total procurement spend. We have initiated engagement with these critical suppliers. As a mitigation measure, they are required to share their management system (ISO 9001, 140001, 45001) and human rights policy and initiatives (UNGC, SA 8000). Further, we have also initiated requesting sustainability and CSR reports, their climate initiatives like SBTi; RE100, Net Zero etc. Most of the critical suppliers have many of these initiatives, as they are globally reputed large original equipment manufacturers (OEM).

- Supplier name/ address
- Goods/ service supplied
- Sustainability reporter
- CDP Responder/ climate initiatives
- IMS certificates • UNGC / Human Rights practices

b. If yes, what percentage of inputs were sourced sustainably?

100%

3 Describe the processes in place to safely reclaim your products for reusing, recycling, and disposing at the end of life, for (a) Plastics (including packaging) (b) E-waste (c) Hazardous waste and (d) other waste.

- All our plants are Single Use Plastic (SUP) free. Other plastic waste are be disposed through scrap vendors.
- Batteries** - are returned to battery OEM, as its covered in ERP – take back mechanism, Damaged solar panels - are returned to respective OEM for repair / material recovery.
- Used Oil, Oil soaked cotton waste, Empty oil drum** - are sent to authorized recyclers/Treatment, Storage and Disposal Facility (TSDF)

4 Whether Extended Producer Responsibility (EPR) is applicable to the entity's activities (Yes / No). If yes, whether the waste collection plan is in line with the Extended Producer Responsibility (EPR) plan submitted to Pollution Control Boards? If not, provide steps taken to address the same.

Owing to the nature of the Company's product/ service offerings, EPR is not applicable to the Company.

Principle 3: Businesses should respect and promote the well-being of all employees, including those in their value chains

1 a. Details of measures for the well-being of employees:

Our people form an integral part of our journey towards transformational, responsible and sustainable change. Our people policies are designed to provide an excellent work environment which is safe, conducive, harmonious and support all round development of our employees. Our efforts to nurture our Human Capital are in alignment with our ESG commitment.

b. Details of measures for the well-being of workers:

In order to ensure safety and well-being at workplace, we conduct various trainings for all our employees as well as contractual workers. We focus on making the trainings relevant and practical by engaging our workforce in different modules. 10. Health and safety management system:**a. Whether an occupational health and safety management system has been implemented by the entity? (Yes/ No). If yes, the coverage such system?**

Yes, The Company has adopted and implemented the IMS framework by integrating all critical business activities and applying principles, processes in order to provide safe and healthy workplaces across all Company's establishments, prevent work related injury and ill health, minimize risks and continuously improve safety performance. AGEL is certified with OHSAS 45001 & ISO 14001.

b. What are the processes used to identify work-related hazards and assess risks on a routine and non-routine basis by the entity?

AGEL has established and aligned globally recognized high level Safety Intervention and Risk Assessment programs such as Safety Interaction (SI), Vulnerability Safety Risks (VSR), Site Risk Field Audits (SRFA), Process Hazard Analysis (PHA), and Pre-Startup Safety Review (PSSR) with Business specific Integrated Management System based Hazard Identification and Risk Assessment (HIRA) Process, e.g., HIRA and Job Safety Analysis (JSA). The Company has adopted this framework and the reporting businesses have developed an ecosystem of participative and

consultative approach for engaging concerned stakeholders, including, employees, associates, and contract workmen.

c. Whether you have processes for workers to report the work related hazards and to remove themselves from such risks. (Y/N)

Yes, The Company uses an established Incident Management and Investigation System for fair and transparent reporting of work-related hazards and risks as unsafe Acts/ unsafe Conditions, near misses, injuries and illness and serious incidents. This is followed by a comprehensive Root Cause Failure Analysis (Investigation), formulation of corrective actions as per Hierarchy of Controls, its tracking and monitoring and subsequent closure. The outcome and learnings from these events and incidents are deployed horizontally across all the plants through a systemic process of 'Critical Vulnerable Factor' (CVF) as a part of Group Safety Governance Process.

To facilitate this, an advanced digital platform on OH&S Reporting has been deployed by Adani Group. The Company access this platform through its machines as well as native and lite Mobile App version.

d. Do the employees/ worker of the entity have access to non-occupational medical and healthcare services? (Yes/ No)

*AGEL is in process of implementing the SA8000. Projects and operating plants have been assessed and certified for OHSAS 45001 by the external agency TUV NORD India.

15. Provide details of any corrective action taken or underway to address safety-related incidents (if any) and on significant risks / concerns arising from assessments of health & safety practices and working conditions.

All the safety related incidents are investigated properly as per the defined process. All the identified CAPA actions are defined and implemented horizontally at all sites to ensure the restriction of reoccurrence of same type of incident. All the CAPA actions are tracked through Gensuite system and reviewed at periodic interval by management for checking implementation and effectiveness of the same.

Principle 4: Businesses should respect the interests of and be responsive to all its stakeholders**1. Describe the processes for identifying key stakeholder groups of the entity.**

We believe that engagement with stakeholders is key to understanding their needs, working

with them to minimize risks, maintaining social legitimacy, improving credibility, and gaining their trust.

We identified our stakeholders as groups and individuals, who can influence or/ are impacted by our operations/ activities, change in technology, regulations, market, and societal trends either directly or indirectly which comprise of communities, employees, supply chain partners, customers, investors, regulators, and civil society organizations for all its operations. We commit to engage openly and authentically with our stakeholders to enhance cooperation and mutual support for a sustainable relationship.

To achieve positive and effective stakeholder engagement, we follow a four-step process. We

gather inputs from various business verticals for stakeholder feedback and carry out direct

engagements with the stakeholder categories. The inputs thus gathered are incorporated into decision-making and driving continuous improvement through activities and initiatives.

The four steps are mentioned as follows:

- 1) Stakeholder Identification,
- 2) Significance of impacts,
- 3) Prioritization,
- 4) Engagement.

Our engagement process has significant outcomes that consistently affect our performance.

This is reported to all the stakeholders through the ESG report.

Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency? (Y/N) If yes, name of the external agency.

Yes, this data has been subject to independent assurance by DNC Business Assurance India Private Limited and its report shall form part of this Integrated Annual Report.

7. Does the entity have any project related to reducing Green House Gas emission? If Yes, then provide details.

AGEL generates electricity through renewable energy sources. AGEL is committed to develop and operate renewable energy generation capacity of 25 GW by 2025 and 45 GW by 2030 with average tariff below Average Power Purchase Cost (APPC) at the national level. AGEL is also committed to Invest USD 20 billion by 2030 in low- and middle-income countries to pursue just and inclusive energy transitions. In line with Adani Group's target to meet India's Climate Change (NDC) commitments of emission reduction, the Company has taken various initiatives such as:

- Supporting low carbon economy
- Providing low carbon energy and decarbonizing the grid
- Focus on CO₂ emission reduction
- Matching the load curve through hybrid (solar +wind) power plant
- Energy Network Operation Centre (ENOC) launched a digital monitoring platform for optimized responsiveness

8. Provide details related to waste management by the entity, in the following format:
