Leadership Indicators

BFS Group provides varied financial products and services to its customers. However, lending and insurance (life and non-life) are the largest businesses for the Group. The broad lifecycle of these businesses has been summarised below:

Sourcing: Loans and Insurance are sourced through multiple channels such as walk-in at branches/offices, own digital platforms (website/mobile apps), agents/intermediaries etc. Depending on the type of product, information/applications are obtained from the customer either physically or electronically.

Underwriting: All loans and insurance products go through an underwriting mechanism, where eligibility for the product, validation of the documents provided, genuineness of the transaction, compliance with applicable regulations etc. are verified. Depending on the type of product, customer profile and other parameters, the underwriting can either be completely automated or may require manual intervention. Upon satisfaction with the above, including adherence to internal risk parameters, the product is issued to the customer (loan in case of lending and policy in case of insurance).

Servicing: After the issuance of product, there can be various reasons for which a customer may need servicing. While collecting instalments in case of loan or paying claims in case of insurance are the most obvious parts of customer servicing, there can be many more instances when a customer can reach out such as requesting change in personal information, adding/changing nominees, grievance redressal etc. As a Group, we believe in enhancing customer experience and have a number of digital tools where the customer can self-service and in the alternate, they can also reach out at our offices/branches, write to/call us etc.
