| CSL is setting up a wind-solar hybrid power plant with a total capacity of about 17 MW and is expanding rooftop solar installations from 1.5 MWp to 4 MWp in a phased manner. This project aims to generate around 40 million units of green energy annually, exceeding CSL's present average annual energy consumption of 33.5 million units. By transitioning to renewable energy, CSL plans to operate on 100% green energy, ensuring a stable energy supply, meeting its energy needs, and supporting its commitment to sustainable energy practices. Governance, Leadership & Oversight

7. Statement by director responsible for the business responsibility report, highlighting ESG related challenges, targets and achievements (listed entity has flexibility regarding the placement of this disclosure)

CSL is committed to addressing the environmental, social, and governance (ESG) challenges facing the industry and aligning with India's goal of achieving carbon neutrality by 2070. As a CPSU under the Ministry of Ports, Shipping, and Waterways, CSL has taken significant steps to contribute to sustainable development.

CSL is advancing sustainable maritime solutions through various initiatives. We have delivered India's first hydrogen-fuelled electric vessel to the Inland Waterways Authority of India (IWAI) and have so far delivered 15 out of 23 Hybrid Electric Catamaran Hull Vessels for the Kochi Water Metro Project. Additionally, we have delivered two Autonomous Electric Vessels to Norway and are currently constructing vessels for European clients, including Commissioning Service Operation Vessels, Zero Emission Feeder Container Vessels, and Hybrid Service Operation Vessels. Furthermore, we are building eight Hybrid Electric Catamaran Hull Vessels for IWAI, of which two have already been delivered. All these vessels are designed for electric propulsion, reducing their environmental impact.

In our commitment to renewable energy, CSL is setting up a wind-solar hybrid power plant with a total capacity of about 17 MW. This project will generate more green energy than our current average annual consumption, enabling CSL to operate entirely on renewable energy and significantly reduce our carbon footprint.

These efforts reflect CSL's dedication to sustainable practices and our role in driving the maritime industry's green transition.

###### 12. Describe the measures taken by the entity to ensure a safe and healthy work place.

The Occupational Health and Safety Management System at Cochin Shipyard, known as the HSE Governance System, fosters a positive safety culture by encouraging employees to adhere to safe work practices. To reinforce this commitment, employees are rewarded monthly and on National Safety Day for their safe actions. Each employee group selects a Field Safety Representative (FSR) to oversee workplace safety. Additionally, a dedicated team of approximately 250 Safety and Fire staff continuously monitor activities on vessels, workshops, and skids. These staff members are responsible for issuing work permits as needed and issuing violation tokens when unsafe practices are observed.

The commitment of top management to safety is further demonstrated through weekly walk-throughs and monthly pep talks at worksites by Section Heads, General Managers, and Chief General Managers. CSL meticulously evaluates its subcontractors based on their HSE performance and mandates adherence to our rigorous HSE policies and standards. We collaborate closely with our subcontractors, ensuring they are equipped with the requisite resources and training to execute their tasks safely. Continuously monitoring their HSE performance, we provide constructive feedback to facilitate improvement.

Recognizing the significance of subcontractors' HSE performance, we have implemented a robust evaluation process to ensure alignment with our HSE standards and regulations. The HSE Star rating represents the annual performance of CSL subcontractors in terms of Health, Safety, and Environment aspects. Additionally, an HSE and sustainability management supplier code of conduct has been published for suppliers.

**8. Does the entity have any project related to reducing Green House Gas emission? If yes, then provide details**

CSL is setting up a wind-solar hybrid power plant with a total capacity of about 17 MW and is expanding rooftop solar installations from 1.5 MWp to 4 MWp in a phased manner. This project aims to generate around 40 million units of green energy annually, exceeding CSL's present average annual energy consumption of 33.5 million units. By transitioning to renewable energy, CSL plans to operate on 100% green energy, ensuring a stable energy supply, meeting its energy needs, and supporting its commitment to sustainable energy practices. This move will help CSL reduce its carbon footprint and contribute to a more sustainable future.
