Principle 1: Ethics, Transparency and Accountability

Businesses should conduct and govern themselves with Ethics, Transparency and Accountability

1.	Does the policy relating to ethics, bribery and corruption cover only the Company? Yes / No. Does it extend to the Group / Joint Ventures / Suppliers / Contractors / NGOs / Others?	The Policy relating to Ethics, anti-bribery and anti-corruption at present covers the Company its employees, Suppliers, Contractors and other Stakeholders. The policy includes a Code of Conduct prescribed by the Company for all its employees including the Directors. The policy does not extend to the Group/ Joint Venture etc. However, the Company encourages parties associated with its value chain like vendors, contractors, etc. to follow the principles envisaged in the policy.
2.	How many stakeholder complaints were received in the past financial year and what percentage was satisfactorily resolved by the management? If so, provide details thereof in about 50 words or so.	During the financial year 2021-22, no substantial consumer complaints were received. All the product quality feedback / queries were attended & resolved well within the time frame.

Principle 2: Product Lifecycle Sustainability

Businesses should provide goods and services that are safe and contribute to sustainability throughout their life cycle

1.	List three of your products or services whose design has incorporated social or environmental concerns, risks and / or opportunities	Exo Dish Wash Bar / Round Exo Dish Wash Bar is an anti-bacterial dish wash that offers ultra-clean dish-washing and superior hygiene. First in its category, Exo Dish Wash Bar is a pioneering product that incorporates Goodness of Ginger and Power of 'Cyclozan'. The round shape of the bar reinforces the concept of superior design to minimize product wastages thereby affording high economy of use. Ginger has a known legacy of medicinal and anti-bacterial properties. The Company have independently ascertained the germ kill properties of ginger extract which also gets incorporated within the Exo Dishwash bar thereby delivering the goodness and germ kill efficacies of ginger. In addition – Exo has Cyclozan, an efficacious anti-bacterial agent possessing broad spectrum anti-bacterial efficacies. This ensures that food poisoning and other pathogens resulting from food putrefaction are effectively killed affording a superior level of both cleaning and hygiene. Ujala Liquid Detergent The Company have successfully ensured the commercial launch of Ujala Liquid Detergent in marketplace. The liquid detergents offer a novel cleaning value proposition to the consumers in the Indian market largely dominated by powder users. Ujala Liquid Detergent has been proven to offer an instantaneous dirt dissolution but also possesses very high germ kill efficacies whilst ensuring a superior cleaning performance of fabrics. The Company have seen an opportunity to transform washing habits of consumers to adopt liquid detergent solutions which while ensuring good cleaning is also gentle to clothes. Margo Original Neem – Toilet Soap In India, Neem and skin care have had a strong association for generations. And if there is one brand that is the very essence of Neem, that's Margo. In fact, Margo has been a family heritage since 1920. Infused with the beneficial properties of 100% Neem Oil and Vitamin E, Margo Original Neem is just the soap for those looking for healthy and germ-free skin. Continuing the innovation in formulation processes the Company has re-engineered soap noodles through an effective fat charge combination of various oils. These were done without impacting the overall Margo soap sensorials as well as the claim of providing the goodness of 1000 neem leaves. Such a technology shift ensures that we are cost competitive in reacting to market raw material abundance and price pressures without diluting our original value proposition to consumers.

2.	For each such product, provide the following details in respect of resource use (energy, water, raw material and so on) per unit of product (optional)	Reduction during sourcing / production / distribution achieved since the previous year throughout the value chain? The Company has undertaken several initiatives for optimal use of resources which include, raw material, packaging material and process modifications. Reduction during usage by consumers (energy, water) has been achieved since the previous year? Through continuous focus on improvement in product formulation, design and processes employed the Company has delivered its goal of achieving optimal consumption of water and power. In case of Maxo coil, we have demonstrated an efficient coil premix manufacture using lesser amounts of water. This translates to an approximately 18% lesser water usage in coil production. Also, this effort shall lead to lesser power consumption through reduced drying times and better productivity in our plants thereby reducing overall conversion cost for coil manufacture. Overall, in almost all product categories the Company has focused on effective cost re-engineering to mitigate the effect of disproportionate hike in input prices. Efforts have led to usage of optimized ingredient levels in formulations thereby, helping in reducing environmental load.
3.	Does the Company have procedures in place for sustainable sourcing (including transportation)? If yes, what percentage of your inputs was sourced sustainably? Also provide details thereof, in about 50 words or so	The Company has implemented various sustainable supply chain practices and initiatives whilst ensuring timely and cost-effective deliveries for necessary resources. The use of completely natural surfactants in both personal care and household care is being currently explored as effective substitutes for fossil-based surfactants. The use of gluconate salts in liquid detergents as sequestrants in place of the conventional phosphonates or EDTA, both of which aren't environmentally friendly reflects company's commitment to use environment friendly and benign materials.
4.	Has the Company taken any steps to procure goods and services from local and small producers, including communities surrounding their place of work? If yes, what initiatives were taken to improve their capacity and capability of local and small vendors?	It has always been the priority of the Company to identify and develop alternative local suppliers of raw materials, packaging materials, and various other services. There are multiple vendors for most of our widely used raw materials and endeavor is to identify many more. A specific case in point is our usage of a swellable gelling polymer from a local Indian company for manufacture of hand sanitizer gels during the pandemic instead of importing such swellable polymers. Primary alcohol ethoxylate non-ionic surfactant and poly-(acrylic acid) which were imported earlier have been replaced by local supplier source and is being used commercially. The Company takes steps for capacity building of local and small vendors. The Company's contractors who supply labour services for plant operations employ workmen from nearby communities. This workforce is educated and provided training in various operational aspects of the job at factory which also includes strong exposure to occupational health and safety

Also provide details thereof, in about 50 words or so	Yes, the Company has mechanisms in place to recycle products and waste generated. 100% of product manufactured including waste are consumed in the manufacturing process. Any defect material which might arise during processes are reworked fully. The company is constantly engaged in innovating and improving its products packaging which include multilayered and monolayer plastic, laminates etc. Further, the Company has also taken an initiative to improve the environmental impact and is committed in making the world a better place. Together, with Company's partners, the Company is working towards innovative solutions to help address the challenge of plastic waste. The important initiative taken by the Central Government under provisions of the Environment (Protection) Act, 1986 for the purpose of protecting and improving the quality of the environment and preventing, controlling, and abating environmental pollution is by notifying the rules through framing the Plastic Waste Management Rules, 2016 ("Rules"). These rules makes every Waste Generator, Local Body, Gram Panchayat, Manufacturer, Importers and Producers responsible for plastic generated and for the treatment thereto. As a socially responsible organization, the Company has always supported such policies that strive to reduce, reuse, recycle and recover plastic. In the same light, the Company has initiated to get it self-registered under Brand Owner as Extended Producer Responsibility. The Company has partnered with several vendors who shall collect, segregate, and safely dispose of plastic waste on the Company's behalf to the waste disposal facility for which application is already made with the Central Pollution Control Board.
