PRINCIPLE 4: BUSINESSES SHOULD RESPECT THE INTERESTS OF AND BE RESPONSIVE TO ALL ITS STAKEHOLDERS.

Essential Indicators

1. Describe the processes for identifying key stakeholder groups of the entity.

We are an organization born inclusive in nature and purpose. Since our inception, we have included diverse segments of people in our talent pool, contributed to social causes even in tough business climates, treated suppliers like our partners and our customers with dedicated commitment, all along driven by our inclusive values and principles. They indicate how Elgi extended its inclusivity to larger stakeholders from the beginning with its insistence on stakeholder identification and engagement.

Sustainability framework brought a formal process to the philosophy already being practiced at Elgi. Stakeholder consultation on sustainability aspects formed a key part of the exercise. The vast range of stakeholder forums bringing in constant inputs and feedback, we realize, is a great way to link materiality to stakeholder concerns on the one hand and for material goal setting and strategizing on the other hand.

Elgi identifies and prioritizes its key stakeholder segments based on their impact on the organization and the organization's impact on them. We constantly engage with all our stakeholders. We collect stakeholder concerns, which in turn act as inputs for our policies, strategies, actions, and materiality assessment.

Our exercise of identification and prioritization of stakeholders has shown us several segments to be constantly engaged with. This helps us be in touch with their concerns and expectations in a two-way dialogue. This also work as a source of critical stakeholder feedback for us. Elgi keeps evolving these engagement methods periodically, revamping and refining them as per the needs and requirements of the stakeholders and the business.
