24. Overview of the entity's material responsible business conduct issues

S. No.	Material issue identified	Indicate whether risk or opportunity	Rationale for identifying the risk/opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
1	Energy management	Opportunity	Around the globe, there is an urgent need to save energy. By adopting Energy management practices, the Company can not only help in reducing the carbon emissions that contribute to global warming but it will also help in reducing the Company's dependence on limited fossil fuels.	N.A.	Positive - Investing in renewable energy, energy-efficiency can positively impact the Company's financial performance and reduce operating costs over the long term.
2	Managing packaging materials and waste	Risk	Plastic waste is India's and the world's most formidable environmental challenge today. The Company being in the business of consumer products and since majority of its final goods are packed in plastic bottles/ wrappers, the Company consider plastic as risk to the environment and its business. The management of plastic packaging materials, especially at the end-of-life stage, is an issue of significant societal importance and potential business risk.	The Company is committed to developing a sustainable future by investing in advanced packaging research and development and facilitating the creation of recycling infrastructure to ensure that none of its packaging ends up in landfills, aquatic dumps or as litter in the environment.	Negative – Non-compliance with regulatory norms on waste management can lead to fines/ penalties and can adversely affect the operating costs of the Company.

S. No.	Material issue identified	Indicate whether risk or opportunity	Rationale for identifying the risk/opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
3	Climate change	Risk	The potential consequences of climate change can significantly harm the Company's business, and a failure to adopt a suitable strategy or implement it correctly can severely disrupt the Company's business continuity. Being a manufacturing Company, our business is energy intensive and regulators are also very prompt to take corrective action in case of failure from Company side to comply with various laws protecting Environment and which may lead to heavy fines & penalties.	a. Investment in state-of-the-art equipment and automation initiatives at the Company's plant to ensure optimal energy consumption b. Installed 65 KW roof top photovoltaic (solar) power station at Silvassa unit which generates a daily average of 258 KWh energy c. replaced traditional lights with LEDs across plants d. Use of briquettes as alternate energy source e. Installing variable frequency drive (VFD) on major conveyor belt system at some of the Company's plants, reducing its motor power consumption to 40% f. Centralising air compressor, water chiller with single chiller (for winters) and vacuum pump system g. Educate employees about negative impacts of climate change and corrective measure required in day to day life to reduce the impact.	Positive - The adoption of eco-friendly technology and emission reduction techniques may lead to a short term rise in costs, but, it would benefit the Company in a long run for business sustainability. Being a socially responsible organization, apart from statutory compliances Company also takes voluntary measures to mitigate the impact on Environment.
4	Water consumption	Risk	As water is a limited resource, it presents a potential threat to the Company's business operations. Also, poor management of waste water can lead to non-compliance with legal requirements leading to penalties, fines, etc. besides demining image of the Company.	The Company has initiated pilot programs to decrease the consumption of raw water during the manufacturing process, and all its facilities have efficient water recycling and wastewater treatment systems. The Company also aims to implement zero liquid discharge facilities at all its plants in near future.	Positive - The cost of operations is directly related to water consumption. Therefore, effective water management has a positive financial impact not only in the short term, but also in the long term.
5	Product life cycle assessment	Opportunity	Product life cycle assessment will help the Company to gain a comprehensive understanding of the environmental footprint of its products and develop effective plans for mitigating any adverse environmental impacts resulting from its products.	N.A.	Positive - The use of Product Life Cycle Assessment can assist the Company in pinpointing opportunities to promote the use of sustainable materials and circular practices. By doing so, the Company can reduce costs associated with compliance and promote reuse and recycling of input materials. Ultimately, this will result in cost savings for the Company.

S. No.	Material issue identified	Indicate whether risk or opportunity	Rationale for identifying the risk/opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
6	Raw material sourcing and sustainability	Risk	The type of products the Company produces heavily relies on the quality of its raw materials. The potential environmental hazards resulting from climate change could jeopardize the availability and reliability of raw materials for the Company. Additionally, failure to source raw materials sustainably may lead to compliance risks, negatively impacting the Company's ESG performance and rating.	By leveraging our R&D capabilities, the Company can explore potential substitutes for specific raw materials in cases where they become unavailable. Additionally, the Company will collaborate with its vendors to identify sustainable methods for the sourcing, storage, and transportation of raw materials.	Positive - The Company can strengthen its environmental dedication by procuring raw materials from local suppliers. This practice will not only reduce emissions resulting from transportation but also improve product quality and support the regional/national community. Additionally, the Company can benefit from lower raw material costs by sourcing locally. Negative – Inability to procure raw material can impact the production. It can also reduce the margin or create disruption in operations. The Company aspire to have a sustainable supply chain where it can decrease its dependencies to external factors and make it more resilient.
7	Employee health and safety	Risk	Failure to prioritize employee health and safety can result in reduced productivity and an increased risk of injuries and harm to our employees.	Numerous endeavours and undertakings have been established to guarantee the well-being and safety of employees. Additionally, the Company has in place an EHS management system for all its facilities. The Company also conducts regular training for its employees and workers to tackle workplace hazards.	Positive – Allocating financial resources towards employee health and safety can yield positive long-term results by reducing downtime and costs associated with any injury or illness.
8	Human rights	Risk	The ever-evolving regulations surrounding human rights present a challenge for the Company's business. Additionally, addressing modern slavery is a key business risk to remain relevant for future generations.	The Company dedicates significant efforts to ensure that its business practices do not infringe upon human rights and it adheres to all applicable relevant labour laws and regulations.	Negative - Any human rights violations can lead to substantial financial and reputational risks for a company, which can ultimately have a negative impact on the Company's business.
9	Responsible marketing	Risk	In order to establish trust and foster engagement with the Company's stakeholders, it is essential that the Company engage in responsible marketing practices and are transparent about the environmental and societal impacts of its products. It is also important to note that failure to comply with relevant marketing standards, laws, and regulations poses a risk to the Company's business and may result in accusations of greenwashing.	The Company recognize the importance of leading and directing its employees and partners in ethical marketing practices. The Company's commitment to adhering to applicable local, national, and international marketing standards, laws, and regulations, as well as industry self-regulatory guidelines, is a fundamental aspect of its approach.	Positive - Responsible marketing can help a business build a positive reputation and brand image. This can lead to increased consumer confidence, higher sales, and better financial performance.

S. No.	Material issue identified	Indicate whether risk or opportunity	Rationale for identifying the risk/ opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
10	Stakeholder engagement	Opportunity	The connection between decision-making and accountability is essential, and effective engagement between stakeholders and the Company's Board is crucial for informed and meaningful decision-making. Engaging with stakeholders involves providing opportunities for both parties to listen to each other and gain insights into different perspectives. Therefore, the Company place a great importance on engaging with all of its stakeholders in the decision-making process for its business.	N.A.	Positive- Investors are increasingly looking for companies that take a holistic approach to business, which includes engaging with stakeholders, and are more likely to invest in companies that demonstrate a commitment to social responsibility.
11	Diversity and inclusion	Opportunity	An increasing recognition exists that establishing an inclusive workplace where all individuals, regardless of gender, ethnicity, background, preferences, and beliefs, feel valued and included, has a profound impact on stakeholders' perspectives. Cultivating a diverse and inclusive environment allows the Company to become a desirable employer.	N.A.	Positive – Diversity, Equity and Inclusion (DEI) initiatives foster positive relationships among employees and promote a more diverse and inclusive workplace, leading to long-term financial benefits for the Company.
12	Consumer Welfare	Risk	Failing to address consumer complaints and consider their input for product innovation can result in a decline in sales and market share besides losing consumer's confidence and Company's image.	The Company has developed robust relationships with its consumers and established enduring brands that offer value. The Company employ stringent quality control measures to monitor product quality concerns and handle consumer complaints efficiently.	Negative - Failure to address consumers complaints and issues will potentially lead to loss in the consumer base of the Company as well as lose goodwill in the long run.
13	Care for consumer hygiene	Opportunity	Post COVID-19, hygiene and health has become a matter of concern across the globe. The Company being manufacturer/ distributor of hygiene focused products like Exo, Pril, Margo etc. has allowed the Company to meet the consumer requirements pertaining to hygiene and health safety. It exemplifies the agility of our core team, which is always innovating to quickly respond to market developments.	N.A.	Positive - Approximately 45% of the Company's sales are from its products that primarily focuses on health and hygiene of the consumers.
14	Counterfeit Product	Risk	Since the products are sold on trust/ brand image, any duplication/ infringement of a product misleads the consumers about the quality/ effectiveness of Company's original product. Risk arising due to Counterfeit products: a. damages brand image; b. loss of sales; c. loss of brand value; and d. health and safety danger to consumers.	The Company has taken following steps to mitigate the risk associated with counterfeit products: a. appointed various agencies at various Local market to track duplication of the Company's Products b. improvise/ change packaging so the Consumers can differentiate between Branded and duplicate Product. c. create awareness about the Company's various Brands through various mode like TV commercial & Print/ media release, etc. d. conducting raids and taking legal action	Negative - Loss of sales; Reputation risk; Market share decrease; Low quality products to consumers and related hazards; and Media spend go wasted.

PRINCIPLE 2: Businesses should provide goods and services in a manner that is sustainable and safe**Essential Indicators****1. Percentage of R&D and capital expenditure (capex) investments in specific technologies to improve the environmental and social impacts of product and processes to total R&D and capex investments made by the entity, respectively.**

The Company's R&D department has successfully implemented an optimized formulation for the manufacture of its mosquito coils under the Maxo brand. This implementation has been rolled out across all three manufacturing locations, which resulted in a savings of approximately 18% of the water consumption during coil dough manufacturing process. Additionally, this formulation has also led to a reduction in energy demand required during its drying operation.

The Company is sensitive to the concerns of the environment and its surroundings that it operates in.

The Company has installed a mini-ETP facility in March, 2022 to treat the sewage generated from R&D laboratory at Mumbai before discharging this downstream to main Municipal Corporation of Greater Mumbai (MCGM) sewage line.

The Company being in the FMCG industry, it's R&D expenses are always focused towards improving its products considering the Social and Environmental parameters. During the Financial Year 2021-22 the Company had spent ₹ 67.27 Lacs towards capex investments and ₹ 781.39 Lacs towards R&D expenditure. Similarly, the Company for the Financial Year 2022-23 has spent ₹ 116.81 Lacs towards capex investments and ₹ 987.43 Lacs towards R&D expenditure.

2. a. Does the entity have procedures in place for sustainable sourcing? (Yes/No)

Yes, we have formed a Sustainable Procurement Policy which outlines the sustainable sourcing strategy of the Company.

b. If yes, what percentage of inputs were sourced sustainably?

Approximately 70% of the inputs was sourced sustainably. While selecting vendors/ channel partners, the Company always analyse & evaluate the sustainability of the vendors/ channel partners. The Company's continuous initiative to source it's raw material/ packaging material from sustainable vendors/ channel partners will lead towards achieving 100% sustainable sourcing.

3. Describe the processes in place to safely reclaim your products for reusing, recycling and disposing at the end of life, for (a) Plastics (including packaging) (b) E-waste (c) Hazardous waste and (d) other waste.

For Plastics, E-waste and Hazardous waste, we have a best-in-class waste management practice in place. We engage with certified partners for the co-processing of waste.

Plastic:

Reuse - industrial plastic waste is collected at the Company's factories and used in plastic package moulding of the Company's products. This reduces wastage of plastic at the factory level itself.

Recycle / End-of-life disposal:

The Company has engaged CPCB registered plastic waste processors to collect plastic waste from municipal waste sites, public areas, bulk generators like hotels and restaurants. Once the plastic waste is collected, these plastic waste processors weigh the waste, segregate and compress it, and thereafter send it for recycling/end of life disposal. The processed plastic waste is generally sent to either a recycler who converts to plastic granules which are then added to virgin plastic for reuse, or to a co-processor for generation of energy, or to road construction agencies for road construction.

Additionally, the Company has taken significant efforts to reduce its usage of plastic in its packaging. The Company has successfully reduced use of plastic in its Henko Matic (Penta Carton) packaging by 12.67%, in Maxo Liquid Vaporiser by 8.51%, in Maxo 12 Hour Coil by 7.57% and in its Exo Safai Steel by 1.06%.

E-waste:

The Company has engaged a CPCB registered vendor for E-waste collection, disposal & recycling process. For recycling and disposal of E-waste, as and when the plants identify any e-waste, the same is informed to the Central IT team of the Company. Which in-turn requests, the E-waste collecting vendor to collect the e-waste from the specific location and dispose the e-waste in accordance with regulatory norms.

The process adopted by the Company's e-waste vendor is as follows:

The first crusher adopts double-shaft shredding, the second crusher adopts hammer crusher, and the third crusher adopts high-speed turbine crusher. The material is pulverized into powder through three-stage pulverization, and then sorted by air separation equipment and electrostatic separation equipment. This production line has a novel and unique structure, large production capacity and low power consumption, one-time feeding, and multiple machines cooperate to complete; Controlled by PLC, the machine improves the quality of recovered copper and prevents secondary pollution. The recovery rate of copper in waste circuit boards is over 98% through separation and sorting equipment.

Hazardous waste:

For recycling and disposal of hazardous waste:- All hazardous products of the Company are segregated at the depot level and sent to the respective State Pollution Control Board (SPCB) authorised waste management processor for disposal in accordance with regulatory norms.

4. Whether Extended Producer Responsibility (EPR) is applicable to the entity's activities (Yes/No). If yes, whether the waste collection plan is in line with the Extended Producer Responsibility (EPR) plan submitted to Pollution Control Boards? If not, provide steps taken to address the same.

Yes, EPR is applicable and the Company is a registered brand owner under the EPR regime. Further, the Company is compliant with the action plan approved by Central Pollution Control Board (CPCB) for the Financial Year 2022-23 by collecting 100% of its target.

Notes:

- To move towards sustainable and environmentally friendly production methods and techniques, the Company has successfully implemented solar power plants in select facilities during the fiscal year 2021-22, with operations commencing in FY 2022-23. This initiative has had a significant impact in reducing the Company's reliance on non-renewable energy sources and has contributed to its efforts in achieving low carbon production.
- Furthermore, the Company's energy efficiency improvement initiatives in its manufacturing units have resulted in a substantial reduction in its overall energy consumption. This includes discontinuing the use of natural gas in the Company's facilities and implementing alternative energy installations, which have proven to be effective in the Company's quest for sustainable operations.

- 2. Does the entity have any sites/facilities identified as designated consumers (DCs) under the Performance, Achieve and Trade (PAT) Scheme of the Government of India? (Y/N) If yes, disclose whether targets set under the PAT scheme have been achieved. In case targets have not been achieved, provide the remedial action taken if any.**

Although the entity does not have any sites/ facilities identified as designated consumers (DCs) under the Performance, Achieve, and Trade (PAT) Scheme of the Government of India, the Company is committed to promoting a healthy and sustainable lifestyle based on traditional values of conservation and moderation. As part of the Company's voluntary efforts, the Company is actively undertaking initiatives to adopt a climate-friendly and cleaner approach. The Company's aim is to lead by example and contribute to a more sustainable future for its planet.

- 3. Provide details of the following disclosures related to water:**

Parameter	FY (2022-23)	FY (2021-22)
Water withdrawal by source (in kilolitres)		
(i) Surface water	2,414	-
(ii) Groundwater	1,79,002	1,86,101
(iii) Third party water	20,677	19,403
(iv) Seawater / desalinated water	-	-
(v) Others	-	-
Total volume of water withdrawal (in kilolitres) (i + ii + iii + iv + v)	2,02,093	2,05,504
Total volume of water consumption (in kilolitres)	1,71,910	2,04,766
Water intensity per rupee of turnover (Water consumed / turnover) (L/₹)	0.0077	0.0095

Notes: As part of the Company's ongoing commitment to managing water resources responsibly, it is actively working towards reducing water footprint. In the fiscal year 2022-23, the Company have installed water meters in its plants to accurately measure the water withdrawal from surface water sources. While the volume of water obtained from surface sources is minimal and is only used at one plant, the Company did not measure this data in FY 2021-22. However, the Company is now measuring and monitoring its water usage from surface sources moving forward. This allows the Company to better understand its impact on water resources and make informed decisions to promote sustainable water management practices.

- 4. Has the entity implemented a mechanism for Zero Liquid Discharge? If yes, provide details of its coverage and implementation**

As part of the Company's continued dedication to responsible water resource management, the Company is actively striving to reduce its water footprint. Currently, the Company has implemented the Zero Liquid Discharge (ZLD) mechanism in six of its plants located in Roorkee, Jammu, Puducherry, Karaikal, Kalingamalai, and Kadanassary.

However, the Company's goal is to implement ZLD in all its plants wherever feasible. Furthermore, the Company is proud to state that it has already started reusing treated water for various purposes, such as gardening, green area redevelopment, and washroom usage. This demonstrates the Company's commitment to sustainable practices and maximizing the efficient use of water resources throughout its operations.

5. Please provide details of air emissions (other than GHG emissions) by the entity, in the following format:

Parameter	Unit	FY (2022-23)	FY (2021-22)
Nox	µg/m3	29	25
Sox	µg/m3	8	8
Particulate matter (PM)	µg/m3	40	77
Persistent organic pollutants (POP)	-	-	-
Volatile organic compounds (VOC)	-	-	-
Hazardous air pollutants (HAP)	-	-	-
Others (Co ₂)	-	-	-

Notes:

- The above emissions have been calculated after taking the average of all plants emission test reports which has been submitted to respective SPCB.
- The Company prioritize environmentally-friendly operations and take measures to minimize air emissions during its manufacturing processes. The main sources of air emissions are closely monitored at regular intervals by a recognized laboratory or agency, as required by the Central and/or respective State Pollution Control Boards.
- The Company diligently report the details of its air emissions to the Pollution Control Board (PCB) on an annual basis through Form-5 (Annual Environment Statement). This transparent disclosure helps us ensure compliance with regulatory requirements and fosters responsible environmental stewardship in its operations.

6. Provide details of greenhouse gas emissions (Scope 1 and Scope 2 emissions) & its intensity, in the following format:

Parameter	Unit	FY (2022-23)	FY (2021-22)
Total Scope 1 emissions	TCo2e	15,016	20,136
Total Scope 2 emissions	TCo2e	19,589	18,277
Total Scope 1 and Scope 2 emissions per rupee of turnover	KgCo2e/₹	0.0014	0.0017

Notes: The Company's relentless efforts to improve energy efficiency in its manufacturing units have yielded significant results, including a substantial reduction in its overall energy consumption and emissions in the Scope 1 category. This has been achieved through a combination of measures, such as discontinuing the use of natural gas in its facilities, implementing alternative energy installations, and utilizing bio briquettes as an eco-friendly fuel source. These initiatives have proven to be highly effective in its pursuit of sustainable operations, resulting in an impressive 25% reduction in the Company's Scope 1 emissions. The Company is proud to be contributing to a greener future through its commitment to environmentally responsible practices.

7. Does the entity have any project related to reducing Green House Gas emissions? If Yes, then provide details.**1. Renewable Energy:**

The Company has taken steps to embrace renewable energy by installing solar plants at specific locations and conducting a comprehensive feasibility study for 14 additional plants. The primary objective of this initiative is to lower the Company's Scope 2 emissions while enhancing its resilience by leveraging clean energy sources.

2. Energy Management:

The Company has undertaken an extensive electrical energy audit across all of its plants, with the purpose of conserving electricity. Each facility was thoroughly assessed, and energy saving recommendations, including the installation of LED lights and AC energy savers, are being implemented based on their feasibility and viability.

3. Emission Reduction:

The Company will take steps wherever feasible that any new purchase of its owned vehicle will be in electric variant. Additionally, the Company has plans to expand this initiative to cover all leased and rented vehicles, while also encouraging its employees to utilize electric vehicles for business travel. This strategic move is part of the Company's commitment to reducing its Scope 1 and Scope 3 emissions, in line with its sustainability goals.

8. Provide details related to waste management by the entity, in the following format:

Parameter	FY (2022-23)	FY (2021-22)
Total Waste generated (in metric tonnes)		
Plastic waste (A)	467	374
E-waste (B)	0.22	0.65
Bio-medical waste (C)	0.01	0.01
Construction and demolition waste (D)	0	0
Battery waste (E)	0.33	0
Radioactive waste (F)	0	0
Hazardous waste - Empty Drums (G)	4	13
Total (A+B+C+D+E+F+G)	471.56	387.66

For each category of waste generated, total waste recovered through recycling, re-using or other recovery operations (in metric tonnes)

(i) Recycled	395	318
(ii) Re-used	36	23
(iii) Other recovery operations	0	0
Total	431	341

For each category of waste generated, total waste disposed of by nature of disposal method (in metric tonnes)

(i) Incineration	0	0
(ii) Landfilling	2.56	11.66
(iii) Other disposal operations	38	35
Total	40.56	46.66

9. Briefly describe the waste management practices adopted in your establishments. Describe the strategy adopted by your company to reduce the usage of hazardous and toxic chemicals in your products and processes and the practices adopted to manage such wastes.

The Company has a robust Environment Management System in place, which is certified as per ISO 14001:2015. The Company's waste management procedures ensure the safe disposal of hazardous waste, e-waste, and other waste.

The Company handle, segregate, store, and transport hazardous waste in compliance with relevant regulatory requirements and industry best practices. The hazardous waste is disposed of in an environmentally responsible manner through authorized vendors for recycling, as stipulated by regulations.

10. If the entity has operations/offices in/around ecologically sensitive areas where environmental approvals/ clearances are required, please specify details

S.No.	Location of operations/offices	Type of operations	Whether the conditions of environmental approval/clearance being complied with? (Y/N)
N.A.			

11. Details of environmental impact assessments of projects undertaken by the entity based on applicable laws

Yes, the Company has conducted environmental impact assessments of its four units viz. Puducherry, Karaikal, Jammu and Roorkee and no negative observations were found during the said assessments.

12. Is the entity compliant with the applicable environmental law/ regulations/ guidelines in India; such as the Water (Prevention and Control of Pollution) Act, Air (Prevention and Control of Pollution) Act, Environment protection act and rules thereunder

Yes

S. No.	Specify the law/ regulation/ guidelines which were not complied with	Provide details of the non-compliance	Any fines / penalties /action taken by regulatory agencies such as pollution control boards or by courts	Corrective action taken, if any

PRINCIPLE 8: Businesses should promote inclusive growth and equitable development

Essential Indicators

- Details of Social Impact Assessments (SIA) of projects undertaken by the entity based on applicable laws, in the current financial year.**

Not applicable to the Company pursuant to the provisions of the Companies Act, 2013 read with the rules framed thereunder.

- Provide information on the project(s) for which ongoing Rehabilitation and Resettlement (R&R) is being undertaken by your entity, in the following format:**

The Company does not have any on-going projects on R&R.

- Describe the mechanisms to receive and redress grievances of the community.**

In case of any complaints, emails can be sent to employeeegrievances@jyothy.com or secretarial@jyothy.com or info@jyothy.com or whistleblower@jyothy.com email ids. Thereafter the issue is reviewed by the concerned department and any investigation, if required, is completed. Based upon the investigation, the concerned department in consultation with the department head provides a satisfactory resolution to the complaint.

- Percentage of input material (inputs to total inputs by value) sourced from suppliers:**

	FY 2022-23	FY 2021-22
Directly sourced from MSMEs/ small producers	34%	32%
Sourced directly from within the district and neighbouring districts	22.84%	25.38%

PRINCIPLE 9 Businesses should engage with and provide value to their consumers in a responsible manner

Essential Indicators

- Describe the mechanisms in place to receive and respond to consumer complaints and feedback**

The Company has a dedicated tollfree customer care number i.e. **+18001032992** and email address i.e. customercare@jyothy.com where the consumer can reach the Company with her/his concerns. The details of customer care number and email id is cited on all the products of the Company as well as on the Company's website under 'Contact' section.

Post receipt of the complaint, if any, the customer care officer raises the issue with the relevant department within the Company. However, while the discussion is on, the quality team requests for the samples in question from the complainant be handed over to the Company representative for ascertaining the cause.
