c. A brief on types of customers

Life Insurance is the primary business of the Corporation. We cater to a wide variety of customers across different segments. Based on various factors like demographics, needs, financial goals etc, the customers can be broadly categorized into the following groups:

- i. Individuals with regular income looking for life cover, tax benefits, savings, etc and who prefer endowment, money back and term plans.
- ii. Self-employed business owners who are interested in wealth creation with risk cover, seeking flexible premium options with a preference for ULIPs and pension plans.
- iii. Minors, students and young professionals: They are mostly covered by term or simple endowment plans and look for low premium.
- iv. Senior citizens: They look towards pension plans and seek guaranteed income and long term security.
- v. Group customers: They include Corporate clients, Government organisations, Associations, NGOs, etc. Group term life, gratuity, superannuation, leave encashment, etc are the types of schemes sought.
- vi. NRI Customers: They take life insurance for family security in India, prefer long term savings or term plans and see us as a secure and trusted brand.
- vii. Rural and social sector customers: We have focussed products under government mandates like PMJJBY, etc wherein affordable insurance is given for low income groups and tailored policies for farmers, labourers, etc.
- viii. High net worth individuals: A distinct group and seek investment oriented plans like ULIPs, wealth plans or pension schemes with large coverage.

26. Overview of the entity's material responsible business conduct issues:

Please indicate material responsible business conduct and sustainability issues pertaining to environmental and social matters that present a risk or an opportunity to your business, rationale for identifying the same, approach to adapt or mitigate the risk along-with its financial implications, as per the following format

Sr. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk / opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
1	Regulatory and Compliance environment	Risk and Opportunity	Regulatory compliance is an integral part of LIC's work ethics. Failure to adhere to any applicable laws in a timely manner can lead to potential legal action, reputational damage or even financial losses. LIC, being a listed company strives to be compliant to all the applicable laws and regulations. By adopting to standards as laid down we believe that we will be able to protect the interest of all our stakeholders. We ensure that all our rules and regulations affecting all our stakeholders are within the legal and regulatory frameworks. As a public sector institution, we are also bound by RTI guidelines which act as an additional layer of scrutiny.	LIC has a well-established system to ensure regulatory compliance which ensures adherence to various regulatory requirements	Financial implications of not addressing the risks identified can include penalties arising from regulators or other legal forums while addressing customer grievances. Losses can also arise from New Business front due to negative customer sentiments. Adherence to regulatory guidelines can enhance customer satisfaction there by increasing our customer loyalty which in turn can increase our persistency and inflow of new customers.
2	Human Capital Development	Risk and Opportunity	Opportunity: As a key player in a financial service industry, our human capital is a major source of strength and competitive advantage. Continuous up-skilling will enable us to strengthen our leadership position and combat all challenges facing the industry in a better way.	LIC is a mammoth trans-national Corporation with approximately one lakh employees. On account of the size and geographical spread as well as keeping with the personnel policies there is continuous vertical and lateral movement in the organisation. All these factors necessitate that there has to be a continuous process of skill development and upscaling the knowledge base within the organisation.	High employee turnover may lead to decrease in productivity, increase in hiring cost and low employee morale as well as efficiency, in general.

Sr. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk / opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
			Risk: In the current competitive scenario and rapidly changing marketing conditions, it is a challenge to retain key talent.	The pandemic situation necessitated and propelled the organisation to move towards self-learning through digital mode. This has enabled standardized content without dependence on physical infrastructure and facilitators and is available anywhere any time on our intranet. The current focus has been to make communication and collaboration easily available as part of the new work experience. Further, with the aim of self-learning/self-skilling, a Learning Management System, 'LIC Gyanpeeth' was introduced for employees.	
3	Climate change – Risk and Resilience	Risk	1. Climate change has a significant effect on life in general. Evolution of life on earth has been a gradual process and not attuned to the drastic speed of change being witnessed now. This can lead to the development of new risks in the form of natural disasters, viruses, bacteria, etc., which will affect morbidity as well as mortality. 2. Insurance industry may expect variations in the assumptions of mortality and morbidity with any negative variation having consequences in terms of higher claim outgoes.	The approach to the same is to find ways and means to anticipate the changes that are coming and take corrective steps to reduce their business and environmental impact for the organisation. Towards mitigating climate change, we continuously focus on optimizing the consumption of scarce resources and thereby reducing the carbon foot print as well as distributing the resources to the populace at large.	1. Higher frequency and severity of such changes will lead to increased expenses towards claims as well as manpower too. 2. Insurers may need to change their tables governing mortality, morbidity, etc and adapt to meet the changing scenario. 3. Reinsurance costs for life insurance companies may increase. 4. Investment in industries exposed to such risks will lead to change in strategy to avoid financial impact of the same.

Sr. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk / opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
4	Information security and data privacy related	Risk	We have the highest number of life insurance policies with the resultant access to personal information. With digital access and information gathered increasing at a humongous rate, the risk of information leakage increases concurrently. Cyber security needs to ensure data privacy and enable sustainable business practice. We have a robust policy for data security. We have inbuilt teams and processes for monitoring any leakage and maintaining data security. Monitoring of data breaches is thus done on a continuous and real time basis for the website, devices and other domains	We hold that data security is of paramount importance and customer privacy is sacrosanct. Any instances of data loss, breach or unaccounted access can affect customer confidence leading to customer attrition thus affecting financial performance. The resultant negative publicity emanating from the same can damage the Corporation's reputation which needs to be protected throughout.	Financial and reputational loss can be damaging and needs to be prevented.
5	Risk Management and Business Continuity	Risk	We have a robust Business Continuity Plan to meet different scenarios. This is to enable quick response in the case of the happening of any unforeseen event or challenges. Its purpose is to act as a shield to protect assets, smoothen and ensure least disruption as well as shorten the recovery time.	The Corporation has a Board approved Business Continuity Plan with inputs from all departments regarding their respective action plans. Risk Registers are maintained and reviewed periodically to enable robust risk management. In case of any major or minor incidents, well drawn out procedures are defined for implementation to mitigate or nullify the potential or actual impact. ISO 22301 certification has been received for the Business Continuity Plan	Negative

If yes, provide details of the same.

- Yes, Processes are in place. Disclosure of interest as well as declaration on Directors' independence is being regularly obtained from Directors and submitted to the Board. To avoid conflict of interests, Directors recuse themselves from participation in any Agenda Item(s) wherever they are deemed interested and is being discussed in a meeting.

PRINCIPLE 2 Business should provide goods and services in a manner that is sustainable and safe

Essential Indicators

1. **Percentage of R&D and capital expenditure (capex) investments in specific technologies to improve the environmental and social impacts of product and processes to total R&D and capex investments made by the entity, respectively.**

R&D mainly focuses on product development, monitoring, modifying, closing as well as introducing newer versions with emphasis on its environmental and social impact too. Customer experience and satisfaction continue to be the bedrock on which initiatives in this aspect are worked out including diminishing the usage of paper across the Board.

Capital expenditure is incurred on replacing old energy inefficient appliances like ACs, light bulbs, lifts, etc with modern energy efficient equipment, Installation of solar equipment for leveraging renewable energy, Rain water harvesting to boost water conservation, etc. Its impact is felt in increased energy efficiency, harnessing recyclable resource like sunlight and conservation of water.

2. **a. Does the entity have procedures in place for sustainable sourcing? (Yes/No)**
b. If yes, what percentage of inputs was sourced sustainably?

- Yes.

As a part of the Insurance industry, our operations primarily revolve around digital solutions. While our procedures do not directly mirror those of traditional manufacturing, we try to follow guidelines and practices that promote ethical

and sustainable sourcing of technology-related inputs. Given the nature of our operations, traditional measures of sustainable sourcing and identifying percentage are not directly applicable. However, we actively participate in broader organisational initiatives to enhance sustainability.

While our operations differ from manufacturing, we strive to adopt guidelines and practices that promote ethical and sustainable sourcing of technology-related resources. We have a procurement policy for the corporation which complies with CVC guidelines, promoting transparency, improving competition, ensuring equity among participants and encouraging 'Make in India'. All procurements are processed through electronic mode by inviting tenders through online channels only eliminating the requirement of physical documents.

3. Describe the processes in place to safely reclaim your products for reusing, recycling and disposing at the end of life, for (a)Plastics (including packaging) (b)E-waste (c)Hazardous waste and (d) other waste

As the Corporation is in the Business of Insurance, there is limited scope for using recycled material. Insurance products per se, are intangible. However, our offices are encouraged to recycle e-waste. Servers, computers, cartridges, ribbons are the primary e-waste generated which is disposed through authorized vendors, who pick up the hardware e-waste from all locations after dismantling/degaussing. Re-cycling certificates are also obtained. For collection and disposal of e-waste and electrical waste, safe disposal collection boxes are kept at various offices. The hardware items which are end-of-life are handed over to the hardware supply vendor under buyback. The vendor, in turn, appoints an e-waste disposal vendor registered with the Central Pollution Control Board or any State Pollution Control Board, who picks up the hardware from all locations. A prescribed certificate is taken from the e-waste disposal vendor.

The Corporation has taken up new initiatives in order to minimize use of paper in our offices by digitizing of operations, thus reducing paper usage. Minimizing the use of single use plastic folders/bottles, replacing plastic folders with paper folders, plastic pots for plants with earthen pots, supply of paper pens in some offices, once the refill is over, these pens with seeds at the reverse, can be planted to grow plants. Replacing disposable cups by stainless steel coffee/tea mugs for employees in some offices.

4 Whether Extended Producer Responsibility (EPR) is applicable to the entity's activities (Yes/No). If yes, whether the waste collection plan is in line with the Extended Producer Responsibility (EPR) plan submitted to Pollution Control Boards? If not, provide steps taken to address the same.

Extended Producer Responsibility (EPR) in the traditional sense is not applicable to us, as our activities are not directly associated with the production of physical goods.

However, to ensure alignment with environmental sustainability, we collaborate with certified e-waste disposal partners to ensure that our electronic waste is managed in an environmentally friendly manner.

Leadership Indicators

1. Has the entity conducted Life Cycle Perspective / Assessments (LCA) for any of its products (for manufacturing industry) or for its services (for service industry)? If yes, provide details in the following format?

Being in the services industry, life cycle assessment as in general parlance is not applicable to life insurance contracts. However, from the angle of product development, periodic evaluation or valuation is a norm. Every plan introduced has certain projections made across various parameters like mortality, morbidity, interest rates, administrative costs, etc. During the course of time, whenever it is felt that the assumptions made therein and the actual results emanating from the field are having a variance beyond the ranges provided for in different scenarios, corrective action is initiated. It may take the form of changes in the parameters governing the same at one end to withdrawal of the plan at the other and coming forth with a revised one, if required.

2. If there are any significant social or environmental concerns and/or risks arising from production or disposal of your products / services, as identified in the Life Cycle Perspective / Assessments (LCA) or through any other means, briefly describe the same along-with action taken to mitigate the same

From the nature of the business as well as it being monitored on a regular basis, no significant social or environmental concerns or risks evolve from the same.

3. **Percentage of recycled or reused input material to total material (by value) used in production (for manufacturing industry) or providing services (for service industry).**

Recycled or reused material is not applicable as life insurance being an intangible product does not partake in such processes.

4. **Of the products and packaging reclaimed at end of life of products, amount (in metric tonnes) reused, recycled and safely disposed:**

Being an intangible product, such a contingency does not arise.

5. **Reclaimed products and their packaging materials (as percentage of products sold) for each product category.**

Being an intangible product, such a contingency does not arise.

10. Briefly describe the waste management practices adopted in your establishments. Describe the strategy adopted by your company to reduce usage of hazardous and toxic chemicals in your products and processes and the practices adopted to manage such wastes.

We are committed to adopting sustainable practices in waste management. While our operations primarily involve software development, technology infrastructure, and digital services, we recognize the importance of responsible waste handling.

Soft copies of forms, certificates, etc., are being issued. Pension documents have been scanned for better servicing and for reducing time lag. Paper stationery is being used judiciously by all employees.

The hardware items which are end-of-life are handed over to the hardware supply vendor under buyback agreement. The vendor, in turn, appoints an e-waste disposal vendor registered with the Central Pollution Control Board or any State Pollution Control Board, who picks up the hardware from all the locations. A certificate is taken from the e-waste disposal vendor in the prescribed form.

Our waste management practices include:

- **Energy-Efficient Infrastructure:** We prioritize the use of energy-efficient infrastructure to minimize resource consumption.
- **Electronic Waste Management:** We have implemented a comprehensive e-waste management program, collaborating with certified disposal partners to ensure proper recycling and disposal of electronic waste.
- **Paperless Initiatives:** We encourage paperless practices and taken up new initiatives to reduce reliance on physical materials in our day-to-day operations.

Leadership Indicators

1. Details of public policy positions advocated by the entity:

LIC has positioned itself as the insurer of choice and continues to sustain its leadership position after 25 years of liberalization with dominant business mix coming from the participating business sourced primarily through agency force. Further, LIC has capitalized on heightened awareness and is pursuing digital engagement and delivery of services with migration of the customers from physical to the digital i.e., 'phygital' mode. A strategic deploying of bionic agents by extending tech support in the form of digital tools and analytics to the agency force is on its way.

We offer inputs/ views/ suggestions on various Exposure Drafts, proposed amendments to Rules, etc to the Regulator through Life Insurance Council considering the best interest of the Policyholder and the Insurance Industry at large.

We conduct Insurance Awareness Campaigns (IAC) every year pan India. Under IAC we have published advertorials in the magazines highlighting our achievements, our product portfolio and various services tendered to the policyholders. We enhance awareness about our products through Print Advertisements in Newspapers and Magazines at the national and regional level on a pan India basis with TV commercials urging people to purchase insurance with their first salary along with animated video(s), highlighting the need of insurance on national and regional news/music and general entertainment channels across India. Creative(s) are prepared for various operational matters such as, updating KYC and submission of NEFT details, revival of the policies, new plans/products. Awareness is created through the social media, by posting relevant messages, about insurance.

LIC has been nominated by IRDAI as the project lead for the State/UTs of Assam, Orissa, Andaman & Nicobar Islands and Lakshadweep for raising insurance awareness and increasing insurance penetration. We are also a part of various committees/ working groups formed by the Life Insurance Council for vetting of new initiatives.

PRINCIPLE 9: Businesses should engage with and provide value to their consumers in a responsible manner

Essential Indicators

1. Describe the mechanisms in place to receive and respond to consumer complaints and feedback

The spirit of customer relations and customer care has been ingrained in our complaint redressal system with emphasis on placing customer oriented personnel at all touch points. IT enabled support system is operationalized to reduce manual interventions and minimize grievances. The Corporation has a customer friendly online system wherein a policyholder registered on the customer portal of LIC of India can register a complaint and track its status through 'LIC's e-services' available on our website www.licindia.in. The complaints registered under IRDAI's Grievance Management System-Bima Bharosa are synced with LIC's complaint management system. The Corporation has Grievance Redressal Officers at Branch/ Divisional/ Zonal/ Central Office levels to redress grievances of policyholders. Their names are available on our website. The respective GROs are available at their Offices for personal interviews with customers on all Mondays between 2.30 PM and 4.30 PM. Customers can meet the GROs on other days also with prior appointment. Customers may also send their grievances through post, e-mail, etc to the respective servicing offices / GROs.

A total of 74 Customer Zones are operative across India from 8.00 AM to 8.00 PM which works as 'one-stop Centre' for resolution of all servicing needs of a customer, with special emphasis on 'Quality Experience'.

LIC has a single Centralized Call Centre service available 24*7. The number is **022-68276827** with a comprehensive IVRS menu as well as an option to speak with a Call Centre executive for specific queries & information and raise CCS (Call Centre Services) Ticket for complaint. These services are available in Hindi, English and eight regional languages.

We have an SMS initiative called LICHELP, where policyholders need to send an SMS LICHELP<POLICYNO> on 9222492224. On receipt of an SMS, an official from the Customer Zone mapped to the servicing branch of the policy, contacts the customer for resolution of his complaint or request. We update the customers at each stage of the policy process through an SMS or an e-mail.

With an objective of attending grievances related to repudiated death claims, 'Claims Review Committees' are set up at the Zonal and Central Office levels. The committee consists of two or more senior officers of LIC and an Honorable Retired Judge of the District Court/High Court.

LIC has a role-based access under two online platforms of the Government of India viz. 1) CPGRAMS (Centralized Public Grievance Redress and Monitoring System) and 2) NCH (National Consumer Helpline) – INGRAM module (Integrated Grievance Redressal Mechanism) available to policyholders to lodge their grievances, which are responded to directly.

2. Steps taken to inform and educate consumers about safe and responsible usage of products and/or services.

Insurance is an intangible product so the normal usage and safety norms do not apply to it. However for continuance of risk cover, premiums must be paid on time. SMS are sent to the policyholders informing them about premium due for payment, wherever mobile number is registered in policy record. Where no mobile number is registered in policy records, we are sending premium due intimation to the policyholders by post, in order to keep policies in force and to enable the customer to enjoy the insurance benefits under the policy. SMS are sent to customers to be careful with fraudsters. Security measures are in place for customers visiting our links for any online transactions.

Services of LIC on WhatsApp is made available where Policyholders can know their premium dues, get Loan and Loan repayment quotation, Premium paid certificate/s, ULIP Unit statement/s, etc. Periodical communication is sent to active customers to educate them on spurious calls and false calls for submission of KYC. Also spurious call disclaimer forms part of our customer communications. We promote in-house digital platforms that provide various customer services to customers periodically. Alerts are conveyed on Social Media. We are publishing advertisement in regional, Hindi & English Newspapers informing about the requirements for settlement of claims. We are also informing and educating the customers by displaying our ads on social media such as Facebook, Instagram page, etc. regularly.

3. Mechanisms in place to inform consumers of any risk of disruption/discontinuation of essential services.

Policyholders are kept updated through SMS about the services requested by them. In case of natural calamity advertisement is given in the new papers, assisting customers with information on claim processing to enable faster and hassle free processing of the claim.

We have a Business Continuity Plan in place with Standard Operating Procedures in case of any risk of disruption/discontinuation of service.

4. Does the entity display product information on the product over and above what is mandated as per local laws? Did your entity carry out any survey with regard to consumer satisfaction relating to the major products / services of the entity, significant locations of operation of the entity or the entity as a whole?
