26. Overview of the entity's material responsible business conduct issues [GRI 3-1, 3-2, 3-3, 201-2]

Material responsible business conduct and sustainability issues pertaining to environmental and social matters that present a risk or an opportunity to your business, rationale for identifying the same, approach to adapt or mitigate the risk along-with its financial implications

S. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk / opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
1	Water Security	R	Fresh water is an important input for both manufacturing processes and domestic purposes of the Company. Processes such as paint booths are water intensive processes in automotive and farm industry. It is important to use quality water to maintain the paint quality. Water scarcity is India's silent crisis and unpredictable rainfall across India makes the manufacturing plants more vulnerable for water shortages. Tractor sales are also largely dependent upon the monsoon in India. Hence insulating against water risk is one of the identified business risks and priorities.	The Company strives to mitigate the water risk by adopting following four methods: 1. The Company utilises various global tools to identify the water risk across its operation sites and value chain. Based upon the amount of risk in respective river basins, the mitigation action is planned and executed. 2. Optimum usage of water in all operations through various water efficiency measures adopted such as low volume water taps, arresting leakages in pipelines, amongst others. 3. Rainwater harvesting: By increasing rainwater storage capacity. 4. Recycling: By installing ETP/STP and RO plants, we strive to increase our recycling capacity. 5. Ground water recharge: By installing specially designed deep aquifer pits for improving ground water table. To ensure the availability of water for the community, the Company is also working on watershed management projects.	Negative Implication: Stoppage of water impacts manufacturing processes and utility set ups.
2	Carbon Emissions	R	The business risk of climate change can affect the Company in multiple ways including regulatory impact on vehicle sales, physical changes which could affect the operating environment of the products, among others. As the Company operates in an evolving carbon emissions regulatory environment, it is essential that the Company plans and works on ways to mitigate the risk.	The Company has laid down a comprehensive and detailed plan to manage its Greenhouse Gas (GHG) emissions. Some of the programs or commitments are mentioned below: 1. Committed for carbon Pricing-invest \$10 per ton of carbon emission. 2. Committed for EP 100 i.e., double-Energy productivity by 2030 in association with The Climate Group. 3. Committed to reduce carbon intensity by 47% by FY 2033-34 (with base year of 2018-19) - signatory to the Science based Targets. 4. Committed to become carbon neutral by 2040. The Company is also focusing on increasing the market share of the electric vehicle portfolio in India, emerging, and developed markets.	Negative Implications: Impacts the environment such as physical damage from floods or brushfire or forced closures. Flow-on effects of climate change or extreme events include supply chain being disrupted by extreme weather.

S. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk / opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
		O	The Company is committed to sustainable business practices by contributing to environment protection and considers carbon emission reduction as one of the strong pillars of preserving natural resources. Carbon Emission reduction helps in reducing the power and fuel cost (which is around 15% of total vehicle conversion cost) and hence improves the bottom-line under the Company's 'Mission Sustainability'.	NA	Positive Implications: Leads to resource efficiencies and cost savings. The adoption of low emission energy sources results in the development of new products and services, access to new markets and building resilience along the supply chain.
3	Waste to Wealth	O	The Company is committed to sustainable business practices by contributing to environment protection and considers waste to wealth as one of the focus areas under sustainability. Production of automobiles involves the generation of waste materials both Hazardous and Non-hazardous waste. The major impact of this waste is environment pollution and resource depletion.	NA	Positive Implications: Reduction in waste generation or recycling of waste leads to economic gains and supports in reduction of Green House Gas (GHG) emissions.
4	Product Stewardship	R	In the current situation, customers have many options to choose from various brands. Competition from peers, customer focus, new regulations, market demand, etc. are some of the drivers for constant evolution and new product development.	To cater to the new product requirements, the Company is engaging in various phases of R&D/production/ marketing of clean automotive products like hybrid vehicles, bio-fuel vehicles, electric passenger vehicle, hydrogen combustion engine vehicle, etc. Further, a full-fledged Product Improvement Roadmap is in place at the Company. This roadmap focuses on reduction in specific fuel consumption, weight reduction, switching to alternative fuels, enhancing product safety, etc. We are fully geared up to leverage opportunities through our initiatives in Shared Mobility, Electric Vehicles, innovative products and extensive product portfolio.	Negative Implications: It is imperative for manufacturers to design products so as to meet changing consumer behaviour and expectations. Creating products and services that are not-sustainable/ not viable/ not accessible/ not affordable will have an impact on overall brand image and economic performance.

S. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk / opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
5	Health and Safety	R	The Company is committed to zero accidents at the workplace. However, certain risks mentioned below have been identified: - Space constraints in older plants - Depletion of level of workforce skills due to retirement and deployment of new contractual/trainee workmen - Less exposure to Latest Technology and high dependency on Manual intervention in manufacturing - Lack of contingencies/ alternative for critical equipment/old equipment	The Company is a people-first company and strives to mitigate the plant's risks arising from health and safety issues. The Company incorporates high safety standards for safe working conditions to achieve an interdependent safety culture. To avoid unsafe incidents, the Company has adopted certain key safety standards, safety tools and practices, including: - ISO 45001 certification for all sites - Implementing globally benchmarked Mahindra safety standards in all manufacturing operations - Work proactively towards eliminating health and safety concerns of the workforce - Installing cutting edge firefighting systems at all manufacturing plant locations - Improving and developing safety skills by creating safety awareness, conducting trainings and dexterity of machining, assembly, safety in material handling etc. - Instituting safety mechanisms based on the recognized Kaizen and Poka-Yoke concepts - Promoting proactive measures to prevent accidents and occupational hazards such as SOPs, internal audits, safety assessments and regular reviews - Rewarding and recognizing commendable achievements in the field of Health and Safety The Company's focus is not only on physical health, but also on the mental health and well-being of employees. The Company creates awareness, provides information, assists employees with counselling, provides them with therapy and training and engages with them on a regular basis on new realities and emotional challenges that they may face daily under the below listed health and wellness pillars: - Physical Health - Food and Nutrition - Psychological well-being - Way 2 wellness	Negative Implications: The consequences of poor health and safety in the workplace have an impact on the safety of the employees. Work-related illness or injury not only puts an employee out of work for a while and impacts their quality of life, it may also damage the business productivity, finances and reputation.

S. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk / opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
6	Sustainable Supply Chain	R	The Company considers suppliers as business partners and strives to develop sustainable supply chain. For delivering right product/services at right time to customers, supply chain plays a vital role and any disruption in supply chain will impact the business of the Company. Moreover, any breach of ESG practices will result in severe impact on supplier's business and also on the business of the Company and its reputation.	The Company has set a stringent Code of Conduct covering all environmental and social aspects for all suppliers. Further, in order to mitigate various supply chain risks such as ESG risk, Financial risk, Safety risk, Labour risk, the Company conducts ESH, Health, Fire & Safety audits for identified suppliers through renowned third-party audit agencies. Based on the improvement areas identified in the audits, suppliers submit mitigation plan. The Company runs various training programs for suppliers namely Business Capability Building (SBCB), Fire & Safety, ESG trainings for identified suppliers to inculcate awareness on impact of factors like Environmental, Social, Governance and Health & Safety.	Positive Implications: Improvement in ESG practices at the supplier's end will improve supply chain efficiency & considerably reduce the risk of supply chain disruption along with reputation risk. This will result in smooth operations.
7	CSR Management	O	In alignment with the Group's RISE Philosophy, CSR at Mahindra is an integral part of the business. There is a defined CSR Policy which outlines the CSR strategy of investing in projects that address nation building priorities as well as focus on local developmental needs across all the locations of the Company. The flagship CSR Initiatives undertaken by the Company focus on empowering underprivileged girls, women economic empowerment and environment conservation. These align to the UN SDG Goals and CSR Framework laid down by the Government and the Company's ESG goals. Flagship CSR Initiatives undertaken during the year include the following. 1. Nanhi Kali -This initiative empowers underprivileged girls studying in government schools from Class 1 to10, by providing educational support and enabling them to successfully complete their schooling. 2. Women's Economic Empowerment - This initiative empowers women by providing essential skills training in various domains which matches with the emerging skill requirements of the industry. 3. Hariyali and Water Management - As a part of environment conservation, these initiatives focus on a massive tree plantation drive to enhance the green cover and biodiversity. The focus is also on addressing climate change aspects through climate resilience-based water management and conservation efforts with the support of community engagement and ownership.	NA	Positive Implications: In compliance with the requirement under the Companies Act, 2013, the Company has spent 2% of the average net profit for the last three financial years on CSR Initiatives during the reporting year. The CSR Initiatives helped achieve the following positive outcomes: - 1. Girl Child Education has enabled access to education and has increased confidence levels of girls to continue education. 2. Women Economic Empowerment has created possibilities for women to tap opportunities to enhance their socio-economic status through employability and career readiness. 3. The Environment conservation efforts have contributed to improved green cover, water security, biodiversity, improved soil and agri-practices resulting in irrigation and water conservation.

Governance, Leadership and Oversight

7 Statement by director responsible for the business responsibility report, highlighting ESG related challenges, targets and achievements [GRI 2-22, 2-12]	The Company's success is defined by its financial performance, but also equally by its ability to make the world a better place. Two years ago, the Company unveiled its 'Planet Positive' strategy - a comprehensive approach to environment sustainability that goes beyond emissions and own operations, recognising the interrelated challenges in areas like circularity, supply chain decarbonisation, developing a portfolio of green offerings, and moving the broader ecosystem forward. The approach is geared towards greening own operations, supporting decarbonisation of the Company's industries, and rejuvenating nature, while incorporating principles of just transition. The Company continues to progress on greening its operations by focusing on renewable energy, energy efficiency, water conservation, waste management and bringing in principle material circularity. True leadership transcends compliance. The Company aspires to be a global leader, pioneering sustainability solutions well before necessitated by regulations or stakeholders. The Company's efforts are recognised by key global organisation, including DJSI and CDP. Collaboration, partnerships and advocacy are crucial to accelerate action. The Company is also actively pursuing cross-industry collaborations to drive change. While the Company has achieved notable progress, it still has a long way to go. The Company is committed to the 'Citizens of the Future', and sincerely appreciates the support from all its stakeholders.

PRINCIPLE 2

BUSINESSES SHOULD PROVIDE GOODS AND SERVICES IN A MANNER THAT IS SUSTAINABLE AND SAFE

ESSENTIAL INDICATORS

1. Percentage of R&D and capital expenditure (capex) investments in specific technologies to improve the environmental and social impacts of product and processes to total R&D and capex investments made by the entity, respectively.

	FY 2023-24 %	FY 2022-23 %	Details of improvements in environmental and social impacts
R&D	47*	23	<u>Development of Trem 4, Trem V, CPCB4, Stage V Technologies</u> - to reduce air pollution - Mitigate Global warming effects Electric tractor - Concept development of e-tractor & POC completion
Capex	28*	13	<u>Facility addition for Born Electric vehicle development</u> - Mainly Battery & Electric Vehicle technology development labs/ Inhouse testing facilities <u>Development of Born Electric Vehicles</u> - Zero Tailpipe emission & improving air quality - Reducing reliance on Fossil fuel

* A large amount of capital expenditure and R&D expenses related to electric vehicles & other technologies to improve the environmental and social impacts of products and processes are done through a separate entity Mahindra Electric Automobile Limited (MEAL) [a Subsidiary of the Company]. The same has been included in the scope of reporting.

2. a. Does the entity have procedures in place for sustainable sourcing? (Yes/No) [GRI 308-1, 414-1]

Yes

b. If yes, what percentage of inputs were sourced sustainably? [GRI 308-1, 414-1]

The Company has been working to enhance the degree of sustainability associated with its sourcing practices under "ONE SOURCING". As part of the sourcing strategy, the Company has set up vendor parks near manufacturing plants, sources from tightly knit clusters and optimizes logistics to reduce fuel consumption, emissions and carbon footprint. Out of the suppliers assessed in FY 2023-24, 45% of suppliers are using renewable energy and 58% of suppliers are using recycled water. Further, the Company is exploring potential collaboration with suppliers towards the adaptation of renewable energy through group companies who produce renewable energy. 34.75% of suppliers by purchase value are certified either for ISO 14001 or 45001.

3. Describe the processes in place to safely reclaim your products for reusing, recycling and disposing at the end of life, for (a) Plastics (including packaging) (b) E-waste (c) Hazardous waste and (d) other waste. [GRI 3-3, 306-2]

CERO, which is India's first and largest network of vehicle recycling facilities, is a brand under subsidiary Mahindra MSTC Recycling Private Limited, established in collaboration with Government of India Enterprise (GOI). CERO strives to achieve the goal of zero pollution, wastage and metal scrap imports.

(a) Plastics (including packaging)

Plastic which is removed from end-of-life vehicle is recycled through agencies authorized by the Pollution Control Board. Granules are prepared from the plastic waste and used as raw material for making new products. The Company does not use any packaging material in its process. The post-consumer plastic packaging waste generated from product and spares are disclosed under Extended Producer Responsibility (EPR) obligations of the Company and its suppliers. Waste management agencies and recyclers authorized by the Pollution control board are engaged to fulfil the EPR targets through channelization of plastic packaging waste from post-consumer market and also through procurement of recycling certificates from authorized recyclers.

(b) E-waste

E-waste is recycled through recyclers authorized by the Pollution Control Board as per E-waste management Rules, 2022.

(c) Hazardous waste

All hazardous waste from the vehicle is removed before beginning the scrapping process. This includes collection of fluid and CFC. The Hazardous waste (fluid) is sent to agencies authorized by the Pollution Control Board for recycling/refining.

(d) Other waste

All the ferrous and non-ferrous metals are extracted from the vehicle for recycling. Some parts are also sold to end users / garages for reuse which is allowed as per Automotive Industry Standard (AIS) 129. Lead-acid battery waste generated in post-consumer market are disclosed under the EPR obligation of battery suppliers to the Company, which ensure recycling through agencies authorized by the Pollution Control Board.

4. Whether Extended Producer Responsibility (EPR) is applicable to the entity's activities (Yes / No).

Yes

If yes, whether the waste collection plan is in line with the Extended Producer Responsibility (EPR) plan submitted to Pollution Control Boards? If not, provide steps taken to address the same.

Yes

5. Has the entity implemented a mechanism for Zero Liquid Discharge? If yes, details of its coverage and implementation. [GRI 303-1, GRI 303-2]

- Yes, Zero Liquid Discharge (ZLD) is one of the main focus areas among all environment related initiatives. No water goes out from the Company's site boundary untreated, except rainwater which passes through dedicated storm water drains. Water is recovered and recycled in the manufacturing process, leaving behind only solid residues that are managed and disposed of safely, thus fulfilling all the process requirements needed for ZLD certification. All the manufacturing plants of the Company are ZLD certified, except one.
- Most of the plants have recharging pits for injecting rainwater to deep aquifers.
- Though the Company relies more heavily on freshwater, recycled water is, and will continue to be, important for the Company to secure enough water to manufacture vehicles and parts. The Company recycled 39% of fresh water through wastewater recycling plants.
- Domestic wastewater is recycled through STP (Sewage Treatment Plant) and process wastewater through ETP (Effluent Treatment Plant). Each STP and ETP has got 3 levels of treatment i.e. Primary, Secondary and Tertiary, followed by advance treatment procedures like Reverse Osmosis (RO).
- Treated water is recycled for processing and cooling requirements.

8. Does the entity have any project related to reducing Green House Gas emission? If Yes, details. [GRI 305-5]

- Yes, the Company is committed to becoming Carbon Neutral by 2040. It is also committed Science Based Targets (SBT) to de-carbonize its growth, thus contributing to keeping global temperature rise below 2 degrees Celsius as per Paris Accord 2015.
- The Company has a robust roadmap for achieving these commitments through improvement in energy efficiency and adoption of renewable energy.
- Few of the initiatives to reduce Green House Gas emission are mentioned below:
 - o Adoption of Renewable energy through solar and windmills
 - o Adoption of clean energy i.e., through switching over from HSD to PNG
 - o Replacement of conventional air circulators with BLDC technology air circulators
 - o Radiant cooling system to optimize the HVAC operating load
 - o Replacement of old conventional lights with LEDs
 - o Installation of energy efficient air compressor
 - o Replacement of old motors with premium efficiency IE3 motors
 - o Installation of Energy efficient inverter split ACs
 - o Installation of auto shut off valves for compressed air
 - o Waste heat recovery from air compressors
 - o Installation of IT guns for spot welding

9. Provide details related to waste management by the entity, in the following format [GRI 306-3, GRI 306-4, GRI, GRI 306-5, GRI 306-4-5, GRI 306-5]:

10. Briefly describe the waste management practices adopted in your establishments. Describe the strategy adopted by your company to reduce usage of hazardous and toxic chemicals in your products and processes and the practices adopted to manage such wastes. [GRI 306-2, GRI 3-3]

- The Company has a robust waste management process and aims to be Zero Waste to Landfill certified for all its sites by 2030.
- The Company's approach to waste management is that of a circular economy aimed at eliminating waste and the continual use of resources. In a circular economy, waste materials and energy become input for other processes or as regenerative resources for nature.
- The Company is committed to responsible disposal as per all applicable norms, leading to better ecosystems. When the waste diversion rate for any company is 99% or more then it can be declared as "Zero Waste to Landfill".
- Landfill diversion can occur through recycling which can include glass, paper, metal, plastic, textile, or electronics (E-Waste), lead batteries etc.
- Organic Waste can be diverted to biological treatment through which the waste is reused. Another method is the thermal treatment (incineration) with the generation of power.
- Hazardous waste such as paint sludge, oily cotton waste can be diverted to coprocessing operation, which can be reused as a resource (fuel) for cement industries. It can be also recycled as raw material.
- Food waste generated at manufacturing plants are moved to the biogas plant for biogas generation. All the non-hazardous waste, which is generated inside the plant like metal, non-metal parts are being recycled.
- Implementing "Zero Waste to Landfill" program resulted in not only environmental benefit but also in business benefit. The Company started looking at all the Company's waste as a valuable resource and started converting it into wealth. This is also called Waste Circular Economy in which the Company's waste is used as a resource for someone.

11. If the entity has operations/offices in/around ecologically sensitive areas (such as national parks, wildlife sanctuaries, biosphere reserves, wetlands, biodiversity hotspots, forests, coastal regulation zones etc.) where environmental approvals / clearances are required, please specify details [GRI 304-1]:

3. With respect to the ecologically sensitive areas reported at Question 11 of Essential Indicators above, provide details of significant direct & indirect impact of the entity on biodiversity in such areas along-with prevention and remediation activities. [GRI 304-2, GRI 304-3]

Not Applicable

4. If the entity has undertaken any specific initiatives or used innovative technology or solutions to improve resource efficiency, or reduce impact due to emissions / effluent discharge / waste generated, details of the same as well as outcome of such initiatives [GRI 3-3]:

Sr. No.	Initiative undertaken	Details of the initiative (Web-link, if any, may be provided along-with summary)	Outcome of the initiative
1	Adoption of renewable energy - Group Captive solar	76 MWp Group Captive Solar Project was implemented for Maharashtra plants, which is expected to generate 100 million Units a year. The project was commissioned on 1 st April 2022	Reduction of GHG emissions & Reduction in energy costs
2	Adoption of renewable energy - Rooftop Solar	In past 4-5 years, 18 MWp rooftop solar projects have been implemented in totality across the manufacturing sites of the Company.	Reduction of GHG emissions & Reduction in energy costs
3	Adoption of renewable energy - Windmill	The Company has implemented 6.3 MW windmills for captive consumption in Maharashtra (through own capex).	Reduction of GHG emissions & Reduction in energy costs
4	Energy efficient blower for paint shop	In paint shops, high energy is consumed by the conventional blowers. This has been replaced with energy efficient EC (electronically computed) motors. This motor consumes around 30% less energy compared to conventional fans. These fans were installed at Nasik, Chakan and Rudrapur plants in the past 2 years. Also the Company has replaced around 1700 air circulators/Fan with BLDC tech fans which saves more energy.	Reduction of GHG emissions & Reduction in energy costs
5	Wastewater recycling	At Chakan and Kandivali plants of Auto division, a new containerized reverse osmosis plant is installed which treats the STP & ETP treated water and converts wastewater into fresh water with potable quality water. The permeated water is used again for processes and cooling tower.	Saving freshwater withdrawal
6	Optimizing plastic in packaging	Carton boxes are converted into re-usable packaging material with the help of a shredder. Due to this initiative, plastic packaging has been reduced.	Plastic waste reduction

5. Does the entity have a business continuity and disaster management plan? Give details in 100 words/ web link.

The Company has prepared an Onsite Emergency Plan (OEP) / Disaster Control Plan (DCP). This Emergency preparedness and response plan for manufacturing unit also includes all the risks and emergencies associated with manufacturing operations. The plan also contains processes towards its mitigation for these emergencies and this OEP plan is subject to regularly conducted mock drills. All these mock drills are scheduled as per the annual calendar. Details of all the external as well as internal responsible stakeholders that are to be contacted in emergency situations are readily available with their respective contact numbers along with respective responsibility communication matrix.

All emergency contact numbers for nearby hospitals and applicable Government Agencies are provided in the OEP/DCP. Designated assembly points considering the safety of the given headcount on a day-to-day basis are mentioned in the plan. Duration of each mock drill is recorded, so as to increase the effectiveness and decrease the time during each iteration. Scenario analysis with high-risk priority number (RPN) emergency and maximum severity is conducted in presence of government authorities and Mutual Aid Response Group (MARG) to demonstrate effectiveness.

6. Disclose any significant adverse impact to the environment, arising from the value chain of the entity. What mitigation or adaptation measures have been taken by the entity in this regard. [GRI 308-2]

There were no significant risks / concerns noticed during onsite supplier assessments with regards to adverse environmental impact.

As a proactive measure, the Company also conducts training programs on environmental impact and sustainability to inculcate awareness among suppliers.

7. Percentage of value chain partners (by value of business done with such partners) that were assessed for environmental impacts. [GRI 308-1, GRI 308-2]

The Company has initiated environmental impact assessment in FY 2023-24 through on-site ESG Audits, and assessed 21.6% of suppliers by purchase value during the year. So far, out of these assessed suppliers, not a single supplier with a significant adverse impact on the environment has been identified. Further, in FY 2024-25, the Company will expand its scope and conduct more audits.
