26. Overview of the entity's material responsible business conduct issues [GRI 3-1, 3-2, 3-3, 201-2]

Material responsible business conduct and sustainability issues pertaining to environmental and social matters that present a risk or an opportunity to your business, rationale for identifying the same, approach to adapt or mitigate the risk along-with its financial implications

S. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk / opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
1	Product Stewardship	O	The Company continuously reviews and improves its product stewardship by integrating advanced quality control processes and aligning product design with the highest safety and sustainability standards. This includes comprehensive R&D initiatives and close monitoring of customer feedback to align with evolving expectations and regulations.	NA	Positive Implications: Investments in sustainable product development and quality improvements enhance brand reputation, drive customer loyalty, and result in greater market share and reduced risk of regulatory penalties or product recalls.
2	Resource Circularity (Including EPR & General Waste Management)	R	Evolving EPR mandates for various waste categories, such as end-of-life vehicles, plastics, batteries, and e-waste, introduce compliance risks and operational challenges. These are compounded by general waste management obligations that require extensive recycling and disposal measures.	The Company addresses this risk through initiatives like CERO Recycling for vehicle takebacks, onboarding of lithium-ion battery recyclers, authorized plastic recyclers, and used oil collection via dealerships. Supplier engagement ensures compliance across all material streams.	Negative Implications: These initiatives involve increased compliance costs and investments in waste infrastructure and traceability. Positive Implications: They reduce the long-term risk of fines and operational disruption due to non-compliance.
3	Water Management	R	Operating in water-stressed geographies exposes M&M to risks of resource scarcity, operational disruptions, and regulatory restrictions. Water management is critical to ensure long-term production stability.	The Company has adopted proactive water conservation strategies, including rainwater harvesting systems, Zero Liquid Discharge (ZLD) installations, and water recycling initiatives across sites to minimize freshwater dependency.	Positive Implications: While capital-intensive initially, these measures mitigate long-term operational and regulatory risks, protecting productivity and reducing potential future liabilities.
4	Carbon Emissions	R	The Company's operational activities contribute to its carbon footprint. Without mitigation, emissions could lead to inefficiencies, investor concerns, and reputational risks.	The Company is investing in renewable energy, improving energy efficiency, and deploying emissions tracking systems.	Negative Implications: These investments lead to higher capital and operational expenditure in the short term. Positive Implications: They help avoid regulatory penalties and maintain competitiveness.

S. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk / opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
5	Carbon Emissions	O	The Company's commitment to becoming carbon neutral by 2040 positions the Company as a sustainability leader. This aligns with global climate goals and presents avenues for innovation, efficiency, and stakeholder engagement.	NA	Positive Implications: Transitioning early to a low-carbon business model unlocks access to green financing, improves brand equity, and reduces long-term costs through energy savings and process optimization. The Company is transitioning toward low-carbon operations through clean energy adoption, green technologies, and emission offset programs. Internal carbon pricing and decarbonization strategies support the 2040 net-zero target.
6	Corporate Social Responsibility	R	The Company operates in diverse communities where social license to operate is essential. Non-compliance or inadequate engagement can lead to reputational risk and regulatory challenges.	CSR initiatives are governed by a Board-level committee and aligned with national development priorities. Projects are strategically implemented and monitored for high social impact and regulatory adherence.	Negative Implications: CSR-related expenditures are ongoing. Positive Implications: These investments foster goodwill, reduce reputational risk, and enhance long-term operational resilience in key geographies.
7	Health & Safety	R	Health and safety lapses can result in injury, legal issues, and production losses. Ensuring workforce well-being is vital for sustainable business operations.	The Company has instituted robust health and safety systems that include frequent training, regular audits, and proactive risk assessments to create a strong safety culture and prevent incidents across sites.	Positive Implications: While there are costs associated with maintaining high safety standards, these measures significantly reduce the financial and reputational impact of workplace incidents, regulatory actions, or downtime.
8	Sustainable Supply Chain	R	The supply chain poses ESG risks due to its complexity, dependency on critical materials, and increasing scrutiny from stakeholders. Any disruptions or lack of traceability can result in reputational and operational risks.	The Company has implemented ESG due diligence across its supply base and collaborates with the Sustainable Supplier Impact Programme (SSIP), a strategic initiative aimed at improving ESG performance among suppliers. The Company is also investing in local sourcing and diversification to enhance supply resilience.	Positive Implications: While implementing responsible sourcing and supplier capacity-building increases near-term costs, these measures are expected to reduce exposure to long-term disruptions, supply shortages, and reputational risks, thereby ensuring stable margins.

Yes, the Company has laid out a separate Code of Conduct for the Board of Directors which sets clear guidelines for avoiding and disclosing actual or potential conflicts of interest with the Company. Directors are required to avoid any actual or perceived conflicts of interest that could impair their ability to perform their duties objectively and effectively. While Directors may engage in personal investments and maintain normal social or business interactions, they must not have interests that could negatively influence their responsibilities as members of the Board. The Code of Conduct outlines these expectations and provides guidance, although it does not cover every possible scenario. Any suspected or potential conflict must be disclosed promptly to the Chairman of the Board, who will assess the situation and decide on the appropriate action. Directors are expected to recuse themselves from discussions or decisions where a conflict exists or may appear to exist.

- b. If yes, what percentage of inputs were sourced sustainably? [GRI 308-1, 414-1]

The Company prioritizes responsible business practices by contributing to environmental protection and enhancing people's performance through green procurement and services while ensuring business growth for the supply chain. The Company has developed a stringent Supplier Code of Conduct to guide suppliers to engage in ethical, responsible, and legal business practices in their operations. This Code is signed by more than 90% of suppliers.

The Company has been working to enhance the degree of sustainability associated with its sourcing practices under "ONE SOURCING". As part of the sourcing strategy, the Company has set up vendor parks near manufacturing plants, sources from tightly knit clusters, optimizes logistics to reduce fuel consumption, emissions and carbon footprint.

Out of 432 ESG audited suppliers in FY24 and FY25, 206 suppliers (47.6%) are using renewable energy, 273 suppliers (63%) are using recycled water.

From the 215 suppliers audited in FY25, 108 supplier (50%) are already using renewable energy, and 146 suppliers (68%) use recycled water in their operations. Further, the Company is exploring potential collaboration with suppliers towards the adaptation of renewable energy through group companies who produces renewable energy. 53% of suppliers by value are certified either for ISO 14001 or 45001.

3. Describe the processes in place to safely reclaim your products for reusing, recycling and disposing at the end of life, for (a) Plastics (including packaging) (b) E-waste (c) Hazardous waste and (d) other waste. [GRI 3-3, 306-2]

CERO, which is India's first and largest network of vehicle recycling company, is a brand under subsidiary Mahindra MSTC Recycling Private Limited, established in collaboration with Government of India Enterprise (GOI). CERO strives to achieve the goal of zero pollution, wastage and metal scrap imports.

(a) Plastics (including packaging)

Plastic which is being removed from end-of-life vehicle is recycled through agencies authorized by the Pollution Control Board. Granules are prepared from the plastic waste and used as raw material for making new product. The Company does not use any packaging material in its process.

The post-consumer plastic packaging waste generated from product and spares are disclosed under Extended Producer Responsibility (EPR) obligations of the Company and its suppliers. Waste management agencies and recyclers authorized by the Pollution control board are engaged to fulfil the EPR targets through channelization of plastic packaging waste from post-consumer market and also through procurement of recycling certificates from authorized recyclers.

(b) E-waste

E-waste is recycled through recyclers authorized by the Pollution Control Board as per E-waste management Rules, 2022.

(c) Hazardous waste

All hazardous waste from the vehicle is removed before beginning the scrapping process. This includes collection of fluid and CFC. The Hazardous waste (fluid) is sent to agencies authorized by the Pollution Control Board for recycling/refining.

(d) Other waste

All the ferrous and non-ferrous metals are extracted from the vehicle for recycling. Some parts are also sold to end users / garages for reuse purpose, which are allowed as per Automotive Industry Standard (AIS) 129.

Lead-acid battery waste generated in post-consumer market are disclosed under the EPR obligation of battery suppliers to the Company, who ensure recycling through agencies authorized by the Pollution Control Board.

The Company aligns with the European Union's ELV Directive, advocating for the responsible dismantling and recycling of End-of-Life Vehicles (ELVs) to minimize environmental impact. Our initiatives include preventing specific heavy metals, de-pollution of fluids, marking polymeric parts, and achieving reuse, recycling, and recovery targets. This directive applies to M1 and N1 vehicle categories, ensuring compliance irrespective of the vehicle's service history. Moreover, all of the Company's products are designed with 100% recyclability or reusability. We ensure major models are devoid of hazardous materials like Lead, Cadmium, and Mercury. Comprehensive dismantling manuals are readily available for all the Company's vehicles. To meet EEC directive 2005/64/EC for ELV regulation, we have implemented specialized procedures. Additionally, for European exports we adhere to the EC directive on Recycle, Recovery & Reuse (RRR). Some of our best-selling products such as the XUV700, Scorpio-N etc. have recovery rates above 95%.

4. Whether Extended Producer Responsibility (EPR) is applicable to the entity's activities (Yes / No).

Yes

If yes, whether the waste collection plan is in line with the Extended Producer Responsibility (EPR) plan submitted to Pollution Control Boards? If not, provide steps taken to address the same.

Yes

LEADERSHIP INDICATORS**1. Has the entity conducted Life Cycle Perspective / Assessments (LCA) for any of its products (for manufacturing industry) or for its services (for service industry)?**

Yes

If yes, provide details

NIC Code	Name of Product/ Service	% of total Turnover contributed	Boundary for which the Life Cycle Perspective / Assessment was conducted	Whether conducted by independent external agency (Yes/No)	Results communicated in public domain (Yes/No)	If yes, provide the web-link.

2. If there are any significant social or environmental concerns and/or risks arising from production or disposal of your products / services, as identified in the Life Cycle Perspective / Assessments (LCA) or through any other means, briefly describe the same along-with action taken to mitigate the same. [GRI 3-3, 306-1, 306-2]

No significant social or environmental risks were identified from the Life Cycle Assessment (LCA) studies carried out.

3. Percentage of recycled or reused input material to total material (by value) used in production (for manufacturing industry) or providing services (for service industry).

Through our LCA studies, we have identified usage of approximately 8% overall recycled material in our vehicles from commodities such as steel, aluminium, cast iron and polymers. We are in continuous progress to identify the recycled input materials for each input material.

4. Of the products and packaging reclaimed at end of life of products, amount (in metric tonnes) reused, recycled, and safely disposed [GRI 301-2, 301-3]:

1. Provide the processes for consultation between stakeholders and the Board on economic, environmental, and social topics or if consultation is delegated, how is feedback from such consultations provided to the Board. [GRI 2-12, GRI 2-13, GRI 2-29]

Engaging with stakeholders is crucial to ensure that the Company's decisions and actions are in line with their expectations. As a key driver of sustainable and responsible business practices, it fosters trust and collaboration, drives innovation and manages risks effectively. Please refer to the Stakeholder Engagement Section of the Company's Sustainability Report to understand how the Company engages with diverse stakeholder groups to consult on economic, environmental and social topics.

The Corporate Social Responsibility (CSR) Committee of the Board of Directors also has ESG under its purview. The CSR Committee sets a direction for ESG and CSR Agenda for the Company and other group companies. The Company also has a Sustainability Council chaired by Dr. Anish Shah, Group CEO and Managing Director and consists of all the Group Executive Board (GEB) members. The Council approves new initiatives and monitors progress of integration of the ESG parameters in business and operations.

2. Whether stakeholder consultation is used to support the identification and management of environmental, and social topics (Yes / No). If so, provide details of instances as to how the inputs received from stakeholders on these topics were incorporated into policies and activities of the entity. [GRI 3-1]

Yes, as part of the Company's materiality assessment, environmental, social and governance (ESG) issues that are significant and relevant to the Company's operation and stakeholders are identified. The materiality process involves a collaborative mapping exercise that engages all stakeholders in the identification of key issues. Top management engagement and stakeholder consultations lead to the development of a final material assessment matrix and a strategic roadmap. Please refer to the 'rise for an equal world' section of the Annual Report to learn more about measures the Company has undertaken as part of the materiality assessment process that was undertaken.

3. Provide details of instances of engagement with, and actions taken to, address the concerns of vulnerable/marginalized stakeholder groups. [GRI 2-29]

The key material issue in social capital is CSR management, where we focus on formulating community-centric policies and implementing a sustainable strategy.

As per the Company's CSR Policy and in alignment with the core purpose, the CSR mission is to:

- Empower Girls
- Empower Women
- Environment Conservation

Some of our key initiatives include:

1. Project Nanhi Kali: The Company's flagship CSR initiative has empowered underprivileged girls across India by supporting their education.
2. Mahindra Pride Classroom: The Mahindra Pride Classrooms provides 40 to 120 hours training modules with the help of expert trainers to final year female students studying in Government Colleges, ITIs and Polytechnic Institutes.
3. Prerna: The flagship intervention, PRERNA is an integral part of various projects which includes training and advisory services like soil health, access to gender friendly farm equipment, linkages to Government welfare support initiatives, resource efficient agriculture methodologies for enhancing crop productivity. The project focusses on female farmers.
4. Water Conservation projects: Various water conservation projects across diverse geographies have been undertaken to prevent soil erosion, improve soil health, and increase water tables through water structure enhancement and creation.

LEADERSHIP INDICATORS**1. Details of a business process being modified / introduced as a result of addressing human rights grievances/ complaints. [GRI 2-25, GRI 3-3]**

There have been no human rights grievances / complaints in FY25 requiring the Company to modify its business processes or introduce new business processes.

2. Details of the scope and coverage of any Human rights due-diligence conducted. [GRI 3-1, GRI 3-3]

The scope and coverage of Human Rights Due Diligence extends to the Company's operations and its value chain partners.

The Company is a signatory to the United Nations Global Compact and is committed to the highest standards of human conduct and the dignity of all those associated with the Company. The Company's Human Rights Policy ensures that all sectors/business units assess the human rights implications of investments, encompassing new projects, joint ventures, acquisitions of existing businesses, and all business partnerships like vendors, dealers, and suppliers.

As part of strengthening its human rights due diligence framework, the Company is currently undergoing the SA8000 certification process—an internationally recognized standard for decent workplaces, grounded in the principles of international human rights norms and national labour laws. This process includes a rigorous evaluation of core areas such as child labour, forced or compulsory labour, health and safety, freedom of association, discrimination, disciplinary practices, working hours, and remuneration.

The certification process involves comprehensive internal audits, worker interviews, management reviews, and stakeholder engagement, thereby reinforcing the Company's ongoing commitment to ethical labour practices. Once completed, the certification will serve as a formal validation of Company's human rights management systems and labour standards, both within its operations and across its value chain.

3. Is the premise/office of the entity accessible to differently abled visitors, as per the requirements of the Rights of Persons with Disabilities Act, 2016?

4. Details on assessment of value chain partners [GRI 414-1, GRI 414-2]:

The Company also conducts ESG audit of suppliers which covers employee health & safety, employee well-being, environmental impact, working conditions along with other environmental, social and governance aspects. The audit also covers various social aspects such as child labour, human rights, minimum wage compliance, etc. The Company initiated ESG audits in FY24 and these were continued in FY25 as well. Cumulatively, audits were completed for 432 suppliers.

	% of value chain partners (by value of business done with such partners) that were assessed
Child labour	32.9% in FY25 55.5% Cumulatively from FY24
Forced/involuntary labour	
Sexual harassment	
Discrimination at workplace	
Wages	
Other human rights related issues	

5. Provide details of any corrective actions taken or underway to address significant risks / concerns arising from the assessments at Question 4 above.

There are no significant risks / concerns observed during third party ESG audits at supplier's end. As a proactive measure, the Company also conducts training programs on human rights which is a part of the ESG training to create awareness among suppliers.

The Company always encourages suppliers to report violation of Code of Conduct (CoC) and any questionable behavior through the Company's protected and confidential reporting channels mentioned in our website or by sending an email to speakup2cpo@mahindra.com. All such communications are kept confidential and due action is taken as per procedures laid down.

5. Has the entity implemented a mechanism for Zero Liquid Discharge? If yes, details of its coverage and implementation. [GRI 303-1, GRI 303-2]

- Yes, Zero Liquid Discharge (ZLD) is one of the main focus areas among all environment related initiatives. No water goes out from the Company's site boundary untreated except rainwater through dedicated storm water drains. Hence, the process required under ZLD is completed where water is recovered and recycled in the manufacturing process, leaving behind only solid residues that are managed and disposed of safely. All the manufacturing plants of the Company are ZLD certified, except one.
- Most of the plants are having rainwater recharging pits for injecting rainwater to deep aquifers.
- Though the Company relies more heavily on freshwater, recycled water is, and will continue to be, important for the Company to secure enough water to manufacture vehicles and parts. The Company recycle 39% of fresh water through wastewater recycling plants.
- Domestic wastewater is recycled through STP (Sewage Treatment Plant) and process wastewater through ETP (Effluent Treatment Plant). Each STP and ETP has got 3 levels of treatment i.e., Primary, Secondary, and Tertiary, followed by advance treatment procedures like Reverse Osmosis (RO).
- Treated water is recycled for process and cooling requirement.

8. Does the entity have any project related to reducing Green House Gas emission? If Yes, details. [GRI 305-5]

- Yes, the Company is committed to becoming Carbon Neutral by 2040. It is also committed for Science Based Target (SBT) to de-carbonize its growth and thus contributing to keep global temperature rise below 2 degrees Celsius as per Paris accord 2015.
- The Company has a robust roadmap for achieving these commitments through improvement in energy efficiency and adoption of renewable energy.
- Few of the initiatives to reduce Green House Gas emission are mentioned below:
 - o Adoption of Renewable energy through solar and windmills
 - o Adoption of clean energy i.e., through switching over from HSD to PNG
 - o Replacement of conventional air circulators with BLDC technology air circulators
 - o Radiant cooling system to optimize the HVAC operating load
 - o Replacement of old conventional lights with LEDs
 - o Installation of energy efficient air compressor
 - o Replacement of old motors with premium efficiency IE3 motors
 - o Installation of Energy efficient inverter split ACs
 - o Installation of auto shut off valves for compressed air
 - o Waste heat recovery from air compressors
 - o Installation of IT guns for spot welding

10. Briefly describe the waste management practices adopted in your establishments. Describe the strategy adopted by your company to reduce usage of hazardous and toxic chemicals in your products and processes and the practices adopted to manage such wastes. [GRI 306-2, GRI 3-3]

- The Company has a robust waste management process and aims to be Zero Waste to Landfill for all its sites by 2030.
- The Company's approach to waste management is that of a circular economy aimed at eliminating waste and the continual use of resources. In a circular economy, waste materials and energy become input for other processes or as regenerative resources for nature.
- The Company is committed to responsible disposal as per all applicable norms, leading to better ecosystems. When the waste diversion rate for any company is 99% or more then it can be declared as "Zero Waste to Landfill".
- Landfill diversion can occur through recycling which can include glass, paper, metal, plastic, textile, or electronics (E-Waste), lead batteries etc.
- Organic Waste can be diverted to biological treatment through which the waste is reused. Another method is the thermal treatment (incineration) with the generation of power.
- Hazardous waste such as paint sludge, oily cotton waste can be diverted to coprocessing operation, which can be reused as a resource (fuel) for cement industries. It can be also recycled as raw material.
- Food waste generated at manufacturing plants are moved to the biogas plant for biogas generation. All the non-hazardous waste, which is generated inside the plant like metal, non-metal parts are being recycled.
- Implementing "Zero Waste to Landfill" program resulted in not only environmental benefit but also in business benefit. The Company started looking at all the Company's waste as a valuable resource and started converting it into wealth. This is also called Waste Circular Economy in which the Company's waste is used as a resource for someone.

11. 3. With respect to the ecologically sensitive areas reported at Question 11 of Essential Indicators above, provide details of significant direct & indirect impact of the entity on biodiversity in such areas along-with prevention and remediation activities. [GRI 304-2, GRI 304-3]

Not Applicable

4. If the entity has undertaken any specific initiatives or used innovative technology or solutions to improve resource efficiency, or reduce impact due to emissions / effluent discharge / waste generated, details of the same as well as outcome of such initiatives [GRI 3-3]:

Sr. No.	Initiative undertaken	Details of the initiative (Web-link, if any, may be provided along-with summary)	Outcome of the initiative
1	Adoption of renewable energy - Group Captive solar	76 MWp Group Captive Solar Project was implemented for Maharashtra plants, which is expected to generate 100 million Units a year. The project was commissioned on 1 st April 2022.	Reduction of GHG emissions & Reduction in energy costs
2	Adoption of renewable energy - Rooftop Solar	In past 4-5 years, 18 MWp rooftop solar is implemented in totality across the manufacturing sites of the Company.	Reduction of GHG emissions & Reduction in energy costs
3	Adoption of renewable energy - Windmill	The Company has implemented 6.3 MW windmills for captive consumption in Maharashtra (through own capex).	Reduction of GHG emissions & Reduction in energy costs
4	Energy efficient blower for paint shop & Replacement of BLDC fan with conventional fan	In paint shops, high energy is consumed by the conventional blowers. This has been replaced with energy efficient EC (electronically computed) motors. This motor consumes around 30% less energy compared to conventional fans. These fans were installed at Nasik, Chakan, Rudrapur plants in the past 2 years. Also the Company has replaced around 1700 air circulators/Fan with BLDC tech fans which saves more energy.	Reduction of GHG emissions & Reduction in energy costs
5	Wastewater recycling	At Chakan & Kandivali plants of Auto division, a new containerized reverse osmosis plant is installed which treats the STP & ETP treated water and converts wastewater into fresh water with potable quality water. The permeate water is being used again for processes and cooling tower.	Saving freshwater withdrawal
6	Optimizing plastic in packaging	Carton boxes are converted into re-usable packaging material with the help of a shredder. Due to this initiative, plastic packaging is eliminated.	Plastic waste reduction

5. Does the entity have a business continuity and disaster management plan? Give details in 100 words/ web link.

The Company has prepared an Onsite Emergency Plan (OEP) / Disaster Control Plan (DCP). This Emergency preparedness and response plan for manufacturing unit also includes all the risks and emergencies associated with manufacturing operations. The plan also contains processes towards its mitigation for these emergencies and this OEP plan is subject to regularly conducted mock drills. All these mock drills are scheduled as per the annual calendar. All the external as well as internal responsible stakeholders that are to be contacted in emergency situations are readily available with their respective contact numbers along with respective responsibility communication matrix.

All emergency contact numbers for nearby hospitals and applicable Government Agencies are provided in the OEP/DCP. Designated assembly points considering the safety of the given headcount on a day-to-day basis are mentioned in the plan. Duration of each mock drill is recorded, so as to increase the effectiveness and decrease the time during each iteration. Scenario analysis with high-risk priority number (RPN) emergency and maximum severity is conducted in presence of government authorities and Mutual Aid Response Group (MARG) to demonstrate effectiveness.

In addition to operational emergency preparedness, the Company has also conducted a climate risk assessment to identify physical and transition risks arising from climate change. This assessment helps in proactively identifying vulnerabilities that could impact operations—such as extreme weather events, regulatory shifts, or energy transition risks—and mapping existing mitigation measures already in place.

To further strengthen overall risk resilience, the Company has implemented an IT Operations and Risk Management Policy, which outlines protocols to manage and recover from potential disruptions to IT infrastructure, cyber threats, and data breaches. This ensures business continuity and safeguards critical operations across digital platforms.

6. Disclose any significant adverse impact to the environment, arising from the value chain of the entity. What mitigation or adaptation measures have been taken by the entity in this regard. [GRI 308-2]

There were no significant risks / concerns noticed during onsite supplier assessments with regards to adverse environmental impact.

As a proactive measure, the Company also conducts training programs on environmental impact and sustainability to inculcate awareness among suppliers.

7. Percentage of value chain partners (by value of business done with such partners) that were assessed for environmental impacts. [GRI 308-1, GRI 308-2]

The Company has initiated environmental impact assessment in FY24 through on-site ESG Audits and continued these in FY25 as well assessing 432 suppliers which covers 55.5% of suppliers by value. In FY25 alone, the Company audited 215 suppliers, which account for 32.9% of total spend. So far, out of these assessed suppliers, not a single supplier has been identified which has significant adverse impact on the environment. Further, in FY26, the Company will expand its scope and conduct more audits.

BUSINESSES SHOULD PROMOTE INCLUSIVE GROWTH AND EQUITABLE DEVELOPMENT

ESSENTIAL INDICATORS

1. Details of Social Impact Assessments (SIA) of projects undertaken by the entity based on applicable laws, in the current financial year. [GRI 413-1, GRI 203-1]

Name and brief details of project	SIA notification No.	Date of notification	Whether conducted by independent external agency (Yes/No)	Results communicated in public domain (Yes / No)	Relevant Web Link
NA	NA	NA	NA	NA	NA

The Company did not start any greenfield project in the reporting year, and hence, no social impact assessments of projects undertaken by the entity were required to be conducted as per applicable laws.

2. Information on project(s) for which ongoing Rehabilitation and Resettlement (R&R) is being undertaken by your entity [GRI 413-1, GRI 413-2]:

S. No.	Name of Project for which R&R is ongoing	State	District	No. of Project Affected Families (PAFs)	% of PAFs covered by R&R	Amounts paid to PAFs in the FY (In INR)
NA	NA	NA	NA	NA	NA	NA

The Company did not start any greenfield project in the reporting year, and hence, no community group was rehabilitated and resettled for any project. Therefore, the question is not applicable.

3. Describe the mechanisms to receive and redress grievances of the community [GRI 3-3, GRI 2-25, GRI 413-1]

The Company has established a formal grievance redressal mechanism at each of its plant locations to ensure timely and effective resolution of concerns raised by the local community. A grievance register is maintained at the plant entrance gates, where community members can directly record their grievances.

Once a grievance is received, it is addressed in accordance with a defined escalation matrix, which typically includes the Plant Operations Head and the Human Resources Team, depending on the nature of the issue. The grievance is first assessed and resolved at the local plant level, ensuring quick and contextual redressal.

In cases where resolution at the plant level is not feasible or requires further intervention, the grievance is escalated to higher management levels as required. This structured approach enables transparency, accountability, and responsiveness to the concerns of the community.

4. Percentage of input material (inputs to total inputs by value) sourced from suppliers [GRI 204-1]:

	FY25	FY24
Directly sourced from MSMEs/ small producers	12%	10%
Directly from within India	88%	84%

5. Job creation in smaller towns - Disclose wages paid to persons employed (including employees or workers employed on a permanent or non-permanent/ on contract basis) in the following locations as % of total wage cost

Location	FY25	FY24
Rural	0.5%	0.47%
Semi-urban	23.4%	21.14%
Urban	8.5%	8.48%
Metropolitan	67.6%	69.91%

(Location categorized as per RBI Classification System - rural/ semi-urban/ urban/ metropolitan)

PRINCIPLE 9

BUSINESSES SHOULD ENGAGE WITH AND PROVIDE VALUE TO THEIR CONSUMERS IN A RESPONSIBLE MANNER

ESSENTIAL INDICATORS

1. Describe the mechanisms in place to receive and respond to consumer complaints and feedback. [GRI 2-25, GRI 2-29]

The Mahindra Relationships Center (MRC) manages Toll free numbers, Social Media Platforms and an email address through which consumer can raise their complaints.

2. Turnover of products and/ services as a percentage of turnover from all products/service that carry information about [GRI 417-1]:

	As a percentage to total turnover
Environmental and social parameters relevant to the product	100.00
Safe and responsible usage	100.00
Recycling and/or safe disposal	100.00

3. Number of consumer complaints in respect of the following [GRI 418-1]:

4. Details of instances of product recalls on account of safety issues [GRI 416-2]:

	Number	Reasons for recall
Voluntary recalls	0	NA
Forced recalls	0	NA

5. Does the entity have a framework/ policy on cyber security and risks related to data privacy? (Yes/No) If available, provide a web-link of the policy. [GRI 2-23, GRI 3-3, GRI 418]

Yes, <https://www.mahindra.com/investor-relations/policies-and-documents>

6. Details of any corrective actions taken or underway on issues relating to advertising, and delivery of essential services; cyber security and data privacy of customers; re-occurrence of instances of product recalls; penalty / action taken by regulatory authorities on safety of products / services. [GRI 3-3]

Not Applicable

7. Provide the following information relating to data breaches [GRI 418-1]:**a. Number of instances of data breaches**

Nil

b. Percentage of data breaches involving personally identifiable information of customers

NA

c. Impact, if any, of the data breaches

NA

LEADERSHIP INDICATORS**1. Channels / platforms where information on products and services of the entity can be accessed (provide web link, if available). [GRI 2-6]**

Information on products and services of the Company can be accessed through: <https://www.mahindra.com/mahindra-services-and-businesses>

2. Steps taken to inform and educate consumers about safe and responsible usage of products and/or services. [GRI 417, GRI 3-3]

An owner's manual is made and is available for every product. This manual is shared with the customer at the time of delivery, which gives the customer all the relevant information for responsible usage of the product. In the case of Tractors, the installation is done at the customers' site wherein the customer is made aware of routine maintenance, Do's & Don'ts along with an explanation of the Warranty & Service policy.

3. Mechanisms in place to inform consumers of any risk of disruption/discontinuation of essential services.

Not Applicable

4. Does the entity display product information on the product over and above what is mandated as per local laws? (Yes/No/Not applicable) If yes, provide details in brief. [GRI 417-1]

Yes, product information is displayed over and above the requirements mandated by local laws. An owner's manual is created and made available for each product. This manual is provided to the customer at the time of delivery, offering comprehensive guidance for responsible product usage. Specifically, for tractors, installation takes place at the customer's site, where they are briefed on routine maintenance, important Do's and Don'ts, and given a detailed explanation of the Warranty and Service policies.

Did your entity carry out any survey with regard to consumer satisfaction relating to the major products / services of the entity, significant locations of operation of the entity or the entity as a whole? (Yes/No)

Yes
