26. Overview of the entity's material responsible business conduct issues:

Sr. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk/ opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
1.	Increased temperature and heat waves	Risk	Increase in temperature and prolonged heat waves may create unsafe environment and cause health & safety risks for the workforce	The Company is implementing newer technology & devices to maintain cooler temperatures around equipment like furnaces, etc. which already involve high temperature. The Company is also looking at building sheds and planting more trees on the plant premises to reduce surface temperatures and provide more resting places to the workforce	Negative

Sr. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk/ opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
2.	Water scarcity	R	Water scarcity & less rainfall/droughts might impact the production processes as water is one of the main resources consumed by the Company.	However, across all three locations, the Company is implementing water storing facilities to maintain reserves up to a weeks' worth of water requirement in case of extreme emergency.	Negative
	Water scarcity	O	Steel pipes and tubes are an important element of water supply/ storage infrastructure. Increasing water scarcity & droughts will lead to increase in demand for developing better and additional infrastructure to store and/or transport water across multiple locations. The demand for pipes/tubes will therefore increase.	The Company works with some of the largest infrastructure developers in India and globally, acting as their trusted supplier for steel pipes & tubes. The Company will continue to leverage its strong track record and relationships to cater to such growing need for increasing water storage/ transport infrastructure.	Positive
3.	Extreme weather events	R	The Company operations may be impacted/ disrupted by extreme weather events like storms/cyclones. In addition to supply chain disruption (due to production stoppage), storms/ cyclones may also cause physical damage to the plant infrastructure. As possibility and frequency of such extreme weather increase, particularly near some of the areas where the Company has manufacturing facilities, the risks of impact on business also increase.	The Company is looking at insurance cover to mitigate financial risks arising from such extreme weather events. The Company is also considering creating additional infrastructure around plant premises to minimise/mitigate impact from storms/cyclones.	Negative
4.	Resource scarcity	O	Due to growing resource scarcity, industries are looking at recycling/ reusing existing materials available. Demand for products from recycled/ reused steel will also increase due to this.	The Company procures from some of the largest steel manufacturers which in-turn have their own sustainability targets and are looking to increase proportion of recycled/reused steel in the final products they supply. The Company is well placed to take advantage of increasing trend and market demand for recycled steel products.	Positive
5.	Net-zero transition	O	To mitigate climate change, there is a growing demand for alternative sources of energy like hydrogen, wind, solar, etc. is increasing	Company products are an important part of such alternative energy infrastructure, particularly the use of hydrogen as a source to drive the net-zero transition. The Company looks to increase focus towards building new products to cater to the need of newer energy sectors like hydrogen, etc. to help accelerate wider decarbonisation journey in India and globally.	Positive
6	Employee Health & Safety	R	The Company aspires to achieve zero harm across our locations. Health and Safety represents an important part of the Company's values.	The Company is committed to providing a healthy and safe working environment for our employees, contractors, business associates, visitors on premises, and above all, communities impacted by our operations. The Company has stringent safety systems in place to achieve its zero-harm vision.	Negative

Note: The Company operates in the business-to-business mode. The Company does not deal with trading houses and does not have dealers or distributors for sale of its finished products. As such, there is no concentration of purchases or sales with any dealer(s)/ distributor(s).

Principle 2: Businesses should provide goods and services in a manner that is sustainable and safe

Essential Indicators

1. Percentage of R&D and capital expenditure (capex) investments in specific technologies to improve the environmental and social impacts of product and processes to total R&D and capex investments made by the entity, respectively.

Particulars	FY 2023-24	FY 2022-23	Details of Improvement in environmental & social impacts
R&D	NA	NA	Not applicable (Refer note below).
Capex	0.4%	34.7%	Investment in solar power plant and energy conversation technology

Note: Given the B2B focus, specifications of the products manufactured are driven by the end-client requirements. Therefore, the Company does not directly engage in any standalone R&D activity.

2. a. Does the entity have procedures in place for sustainable sourcing? (Yes/No)

Yes, the Company has a procedure in place for sustainable sourcing. All new supply chain partners are mandatorily evaluated on environment, health & safety and sustainability parameters before onboarding.

The Company has a Supplier Code of Conduct agreed with key suppliers which mandates the suppliers to consider various environmental and social aspects like resource usage, waste management, minimum wages, child labour, etc. as part of their operations. In addition to this, the Company ensures that majority of its suppliers have got quality and governance-focused international and/or domestic accreditations/certifications, e.g. ISO, etc.

The Company continues to procure all key raw materials like steel sheets, steel bars, etc. from Indian and global multinationals with their own sustainability targets & initiatives thereby contributing to the Company's own sustainable sourcing process on an ongoing basis. The Company has considered various sustainability parameters while approving vendors for procuring ancillary raw materials and packaging materials. The Company engages in periodic engagement with the vendors to ensure compliance with the Supplier Code of Conduct.

Preference is also given to suppliers from nearby locations/districts to reduce carbon footprint from the logistics activity. Only government accredited suppliers are chosen for waste management activities to ensure strictest level of compliance.

b. If yes, what percentage of inputs were sourced sustainably?

Almost 100% of the key raw materials are sourced sustainably from the suppliers, which majorly are large Indian or global multinationals with their own sustainability targets. The Company has a standalone Supplier Code of Conduct to promote sustainability across its wider value chain and supplier network. The Company engages in ongoing interactions with the suppliers to align them with its own vision and aspirations on ESG goals.

3. Describe the processes in place to safely reclaim your products for reusing, recycling and disposing at the end of life, for

(a) Plastics (including packaging)

(b) E-waste

(c) Hazardous waste and

(d) Other waste

Yes, focus on effective waste management is an important aspect of the Company operations. The Company ensures sustainability of resources by reducing, reusing, recycling and effectively managing waste. It has embraced the "3-R" (Reduce, Reuse and Recycle) philosophy for all types of wastes leading to minimisation of raw materials, air emissions, liquid effluents, and other solid waste, in line with legal requirements and industry best practice.

The Company has implemented a ZLD mechanism in all 3 manufacturing facilities. All waste-water and hazardous waste from the process is treated before reusing or disposing. Strict protocols are in place to ensure that the hazardous waste generated as part of the production process is disposed as per the guidelines of Gujarat Pollution Control Boards (GPCB). In line with requirements of EPR regulations, the Company works with accredited third parties only for plastic collection and recycling in order to minimise overall plastic waste. Detailed logs and records are maintained for traceability and tracking.

During the FY 2023-24, the Company has initiated 'co-processing' of the ETP process waste. While earlier, the Company used to pass on the waste to accredited third parties, it now co-processes the waste in collaboration with such third parties and subsequently onwards sells it to other industries like cement, infrastructure, etc for use as an energy source.

The Company operations do not generate any significant e-waste or any other liquid waste. The Company has an internal waste management policy which mandates disposal of the generated e-waste and machinery/equipment waste through authorised dealers only. The functional/departmental head identifies the assets which have reached their end of useful life for disposal. The procurement department enlists certified waste dealer(s) through whom all wastes are managed. The Company only works with designated/ accredited waste recyclers to help with collection, recycling, and disposal.

4. Whether Extended Producer Responsibility (EPR) is applicable to the entity's activities (Yes / No). If yes, whether the waste collection plan is in line with the Extended Producer Responsibility (EPR) plan submitted to Pollution Control Boards? If not, provide steps taken to address the same.

The Company falls under the category of a 'brand owner' using plastics for product wrapping and packaging. As a result, EPR regulation applies to the Company. The Company is responsible for collecting and disposing of the plastic waste generated in the market as a result of its products. The Company collaborates with accredited third parties to develop waste collection plans in order to meet prescribed targets under EPR regulations for plastic collection and recycling and reduce the overall quantum of plastic waste.

During the FY 2023-24, the Company has followed the waste management plans in line with the submissions made to Gujarat Pollution Control Board. The Company also purchases EPR credits from Central Pollution Control Board authorised recyclers, as required, in line with applicable regulatory guidelines.

6. Is there a mechanism available to receive and redress grievances for the following categories of employees and workers? If yes, give details of the mechanism in brief.

Category	Yes/No (If Yes, then give details of the mechanism in brief)
Permanent Employees and Workers	Yes, all employees and workers of the Company have access to grievance redressal mechanism. As part of periodic team/department meetings, an opportunity is provided for employees/workers to voice any concerns and issues. Any compliant/grievance is first discussed with the immediate superior, then with the Department Head. If required, the issue is escalated to the Functional Head and lastly to the Senior management. Plant related complaints (e.g., related to canteen, safety, etc.) are managed by the local plant leadership. Formally, there is a dedicated physical drop box at various locations, which all Company employees/workers have access to and to which they can use to raise any complaints/grievances. Necessary actions are taken by the HR/ stakeholder contact point to resolve the issues as quickly as possible. The HR team also involves various Department Heads as appropriate while resolving the complaints. The resolution is then discussed with the employee/worker who has raised the complaint. If any worker/employee is unhappy with the resolution, the issue(s) can be escalated to Senior Management/VP of HR for further resolution and/or for mediation/arbitration.

10. Health and safety management system:

a. Whether an occupational health and safety management system has been implemented by the entity? (Yes/ No). If yes, the coverage such system?

Yes, the Company is an Integrated Management System Certified Company meeting the requirements specified in ISO 45001:2018 - Occupational Health and Safety Management System.

The Company has a formal health and safety policy and framework, which covers activities across all manufacturing locations, offices. This approach emphasizes the Company's proactive measures to identify and mitigate health and safety related risks, promote a safety-oriented culture, and go beyond compliance with regulatory requirements by implementing leading safety-focused practices across end-to-end operations.

b. What are the processes used to identify work-related hazards and assess risks on a routine and non-routine basis by the entity?

The Company adopts the Hazard Identification and Risk Assessment (HIRA) process wherein the Safety manager(s) and other functional/technical teams work together to proactively identify any hazards associated with the Company activities and evaluate the risks vis-a-vis the control measures in place. This is done for all routine and non-routine activities on an ongoing basis.

The Company also has dedicated Safety manager(s) on site to regularly keep a check on the activities carried out. A regular safety check/maintenance is also carried out to ensure safety of all equipment/machinery in place and ensure there are no risks to employees/workers working with such equipment/machinery.

Through ongoing trainings and tool talks, safety related messaging is continuously communicated to the entire workforce reminding them of various safety protocols, policies and initiatives in place to reduce any safety related risks and flag any potential issues proactively so they can be assessed and addressed on a priority basis.

c. Whether you have processes for workers to report the work-related hazards and to remove themselves from such risks. (Y/N)

Yes, various forums and regular Safety Review Meetings are made available to the entire workforce where they are encouraged to express any safety concerns and work-related hazards. Appropriate proactive action is undertaken to mitigate all identified/ potential work-related hazards based on worker inputs. Any adverse findings or gaps identified as part of ongoing hazard assessments are addressed on a priority basis. The Company also adheres to all other health & safety related requirements specified in ISO 45001:2018 Occupational Health and Safety Management Standard.

12. Describe the measures taken by the entity to ensure a safe and healthy workplace.

The Company has appointed dedicated Safety manager(s) on all 3 manufacturing locations who are responsible for day-to-day implementation of the H&S policies and for proactively identifying improvements opportunities. The safety managers engage in various H&S initiatives to encourage best practice and ensure a very safe work environment across the Company. The Safety managers also proactively work with the other functional teams to identify any hazards and address them. They are also responsible for implementing best practices and technology-focused initiatives in relation to health & safety. There is a compulsory requirement for all workforce to wear protective gear in the plant premises while handling machinery/equipment and PPE while handling oils/chemicals as part of the

manufacturing process. Periodic safety assessments of the plant facilities are undertaken by third parties to ensure compliance with applicable regulations and to maintain best practice in relation to health & safety policies.

During the FY 2023-24, the Company has continued its efforts and initiatives for creating a safe working environment and a strong safety-focused culture by:

- Conducting a full health check-up of employees and workers - the report has been made available to employees/workers digitally as well
- Installing latest technology (e.g. scrubbing system) to monitor air emissions & possible gas leakages and to ensure air emissions are within permissible limits and do not pose any threat to the workforce.
- Celebrating World Environment Day 2023 with the motto "BEAT PLASTIC POLLUTION". In the event, an awareness program on environmental protection was communicated to participants, which included employees and their families. As part of the celebration, employees' families were provided a tour of the plant facility and were invited to participate in activities like tree distribution and tree plantation.
- During the FY 2023-24, following specific initiatives have been implemented at all plants to further enable a safe and health workplace for all employees and workers:
- Installation of a human detection system in the area around extrusion press machine to continuously monitor human presence and proactively prevent any safety incidents
- Installation of robotic systems in extrusion press machine to mitigate risk of human interference in the production process. This also enables enhanced worker safety and boosts overall production level.
- Translucent sheets have been installed on rooftop to maximize natural sunlight in the premises. This results in reduction in stress levels, enhance worker well-being and reduction in overall energy consumption.

During the FY 2023-24, the Company has been awarded with following list of awards by various agencies:

- "Silver Trophy" by Quality Circle forum of India at National Safety Convention on 20th January 2024 at Surat.
- In 8th Annual HSE Excellence & ESG Global Awards 2023:
 - o Kutch plant received 'Safety Gold Award' in Large Scale Manufacturing (Metal) Category

Total volume of water consumption (in KL)	2,72,053	3,43,142
Water intensity per rupee of turnover (in lakhs) (Water consumed (KL)/ turnover in ₹ lakhs)	0.57	0.79
Water intensity per rupee of turnover (in lakhs) adjusted for Purchasing Power Parity (PPP) (Total water consumed in KL / Revenue from operations in lakhs adjusted for PPP)	12.96	17.98

Note: The revenue from operations has been adjusted for PPP based on the latest PPP conversion factor for India published by the World Bank for 2022 which is 22.90.

Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency? (Y/N) If yes, name of the external agency.

No, the Company has not undertaken any independent assessment/assurance of the environmental data disclosed in the report.

4. Provide the following details related to water discharged (mention the level of treatment for each category):

Parameter	FY 2023-24	FY 2022-23
Water discharge by destination and level of treatment (in kilolitres)		
(i) Surface water		
(ii) Groundwater		
(iii) Third party water		
(iv) Seawater/ desalinated water		
(v) Others – with treatment		
- Reused in plant operations (EPT treated)	48,745	50,285
- Used for gardening (STP treated)	1,20,449	1,25,242
Total Water Discharge (in kilolitres)	1,69,194	1,75,527

The Company has implemented water treatment mechanism at all three manufacturing processes. The Company has both Effluent Treatment Plants and Sewage Treatment Plants to treat the underlying water captured from the operations. Depending on the requirements, the Company treats all the used water through either the ETP or STP. The ETP-treated water is reused in the manufacturing activity. The STP-treated water is used for gardening purposes in the factory premises.

Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency? (Y/N) If yes, name of the external agency.

No, the Company has not undertaken any independent assessment/assurance of the environmental data disclosed in the report.

5. Has the entity implemented a mechanism for Zero Liquid Discharge? If yes, provide details of its coverage and implementation.

The Company has a Zero Liquid Discharge (ZLD) mechanism in place at all 3 manufacturing facilities. It covers the end-to-end plant operations. Water from STP is used for gardening purposes on the plant premises. Water from ETP is reused in the production processes. Any solid waste generated is disposed of using approved third-party agencies.

6. Please provide details of air emissions (other than GHG emissions) by the entity:

Parameter	Please specify unit	FY 2023-24	FY 2022-23
NOx			
SOx			
Particulate matter (PM)			
Persistent organic pollutants (POP)			
Volatile organic compounds (VOC)			
Hazardous air pollutants (HAP)			

Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency? (Y/N) If yes, name of the external agency.

Through government accredited third party agencies, the Company regularly monitors air emissions from its operations at all three manufacturing facilities in line with requirements of ISO standards and local pollution control regulations. Across all locations, all air emissions during the FY 2023-24 are within the permissible limits. The Company has implemented various environmental control measures and technology to reduce its air emissions. It also uses natural gas in its operations which have low air emissions compared to traditional fuels like petrol and diesel.

7. Provide details of greenhouse gas emissions (Scope 1 and Scope 2 emissions) & its intensity:

Parameter	Unit	FY 2023-24	FY 2022-23
Total Scope 1 emissions (Break-up of the GHG into CO ₂ , CH ₄ , N ₂ O, HFCs, PFCs, SF ₆ , NF ₃ , if available)	Metric tonnes of CO ₂ equivalent	8,628.53	8,952.54
Total Scope 2 emissions (Break-up of the GHG into CO ₂ , CH ₄ , N ₂ O, HFCs, PFCs, SF ₆ , NF ₃ , if available)	Metric tonnes of CO ₂ equivalent	55,938.41	54,010.36
Total Scope 1 & Scope 2 emissions		64,566.94	62,962.90
Total Scope 1 and Scope 2 emission intensity per ₹ of turnover (Metric tonnes of CO ₂ equivalent/ turnover in ₹ lakhs)		0.13	0.14
Total Scope 1 and Scope 2 emission intensity per rupee of turnover (in lakhs) adjusted for Purchasing Power Parity (PPP) (Total Scope 1 and Scope 2 GHG emissions / Revenue from operations in lakhs adjusted for PPP)		3.08	3.30

The Scope 1 and Scope 2 calculations are from the energy, electricity and fuel usage at the corporate office, three manufacturing facilities and the branch offices in India. Scope 1 calculations are undertaken using guidelines and emissions factors prescribed by IPCC (2006 version). Latest GWP factors published as part of AR6 are used for the calculations. Scope 2 calculations are undertaken using the emission factors prescribed by Central Electricity Authority (version 19).

The Company activities do not involve any process or fugitive emissions.

Note: The revenue from operations has been adjusted for PPP based on the latest PPP conversion factor for India published by the World Bank for 2022 which is 22.90.

Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency? (Y/N) If yes, name of the external agency.

No, the Company has not undertaken any independent assessment/assurance of the environmental data disclosed in the report.

8. Does the entity have any project related to reducing Green House Gas emission? If Yes, then provide details.

Reducing the greenhouse gas emissions is one of the key priorities for the Company. Given its energy intensive operations, the Company has invested heavily in reducing its reliance on energy from traditional fossil fuels and in-turn transition towards using energy from renewable sources like wind and solar. Additionally, the Company also implements latest technology and adopts energy efficient processes to reduce its overall energy consumption.

During the FY 2023-24, the Company has taken the following initiatives/implemented the changes in its overall manufacturing process to reduce greenhouse gas emissions from its operations:

- Installed a 12MW ground-mounted solar plant at the Harij, Patan site, allocating 4MW for the Indrad plant and 8MW for the Kutch plant. This crucial initiative during the FY 2023- 24 has resulted in a significant reduction in usage of non-renewable energy source. The Company has almost doubled its contribution of energy from renewable sources to 49% compared to 26% in previous financial year of total electricity consumption.
- Engaged in more efficient utilization of resources and reduced overall usage of polyethylene. The Company has saved a total of 737 MT polyethylene through a combination of process changes like minimization in rejection, reduction in wastage, reduction in weld bead height, etc.
- Installed high energetic servo-drivers and variable frequency drivers on all machineries including furnace and cranes. All new machinery is equipped with energy efficient IE3 motors, which ultimately results in enhancing operational efficiency and reduced energy consumption.
- Installed Active Harmonic filters to transformer output lines to reduce damage to electronic equipment and enhance power quality. For air compressors, the Company has installed a common true load-sharing system for all 4 air compressors. This results in integrated control architecture, easy management of consumption requirement, low energy usage and elimination of inefficiencies of independent control systems.
- Installed 378 LED having 105 watt and 14 LED across various plant location to replace halogen bulbs for optimized energy use and savings.
- The Company has also received various awards during FY 2023-24 in relation to its environmental initiatives and progress made over time. In the 8th Annual HSE Excellence & ESG Global Awards 2023:
 - Indrad plant received ‘Environment Gold Award’ in Large Scale Manufacturing (Metal) Category
 - Chhatral plant received ‘Environment Gold Award’ in Large Scale Manufacturing (Metal) Category

Such awards and recognition are a testament to the Company's ongoing focus and commitment to reducing its overall environmental impact.

9. Provide details related to waste management by the entity, in the following format:

Parameter	FY 2023-24	FY 2022-23
Total Waste generated (in metric tonnes)		
Plastic waste (A)	176.00	203.00
E-waste (B)	0.51	0.51
Bio-medical waste (C)	0.008	0.04
Battery waste (E)	-	0.03
Other waste (F) Cotton rags & cleaning materials	146.76	1.92
Other waste (F): X-ray films	0.77	3.20
Other Hazardous waste. Please specify, if any. (G) Process waste + ETP Sludge + Fixer	828.37	786.90
Other Hazardous waste. Please specify, if any. (H) Used oil	29.81	1.38
Other Non-hazardous waste generated (I) Discarded barrels	8.03	5.00
Total (A+B + C + D + E + F + G+ H+I)	1,190.25	1001.99
Waste intensity per rupee of turnover	0.0025	0.0023
Waste intensity per rupee of turnover adjusted for Purchasing Power Parity (PPP) (Total waste generated/Revenue from operation adjusted for PPP)	0.057	0.053

Note: The revenue from operations has been adjusted for PPP based on the latest PPP conversion factor for India published by the World Bank for 2022 which is 22.90.

	FY 2023-24	FY 2022-23
For each category of waste generated, total waste recovered through recycling, re-using or other recovery operations (in metric tonnes)		
Category of waste		
(i) Recycled (Plastic waste + E-waste)	176.51	132.51
(ii) Re-used (STP waste)		
(iii) Battery waste	-	0.03
(iv) Cotton rags & cleaning materials	146.76	1.92
(v) X-ray films	0.77	3.20
(vi) Used oil	29.81	1.38
(vii) Discarded barrels	8.03	5.00
(viii) Other recovery operations – Co-Processing of ETP Sludge	828.37	-
Total	1190.25	144.05
For each category of waste generated, total waste disposed by nature of disposal method (in metric tonnes)		
Category of waste		
(i) Incineration (Biomedical waste) -	0.008	0.045
(ii) Landfilling (ETP sludge)	-	608.43
(iii) Other disposal operations		
Total	0.008	608.47

Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency? (Y/N) If yes, name of the external agency.

No, the Company has not undertaken any independent assessment/assurance of the environmental data disclosed in the report

10. Briefly describe the waste management practices adopted in your establishments. Describe the strategy adopted by your Company to reduce usage of hazardous and toxic chemicals in your products and processes and the practices adopted to manage such wastes.

The Company has robust waste management practices in place and continuously strives to reduce the amount of waste to landfill or incineration. All its facilities have Zero Liquid Discharge mechanisms. STP treated water is reused on plant premises for gardening purposes. ETP treated water is reused for the production process. Waste like used oil, discarded drums, containers, plastic waste, contaminated cotton rags and other cleaning materials, used X-ray films etc., generated from the manufacturing processes are sent for recycling through accredited third parties. ETP sludge generated is treated and disposed of responsibly as per GPCB guidelines. During the FY 2023-24, additional measures have been undertaken to co-processes ETP sludge to convert it into a raw material/energy source for other industry sectors like cement, infrastructure, etc. which has further reduced the amount of waste going to landfill.

11. If the entity has operations/offices in/around ecologically sensitive areas (such as national parks, wildlife sanctuaries, biosphere reserves, wetlands, biodiversity hotspots, forests, coastal regulation zones etc.) where environmental approvals / clearances are required, please specify details:

None of the plants/offices of the Company fall in/around ecologically sensitive areas.

12. Details of environmental impact assessments of projects undertaken by the entity based on applicable laws, in the current financial year:

During the FY 2023-24, no environmental impact assessment has been undertaken by the Company.

13. Is the entity compliant with the applicable environmental law/ regulations/ guidelines in India, such as the Water (Prevention and Control of Pollution) Act, Air (Prevention and Control of Pollution) Act, Environment protection act and rules thereunder (Y/N). If not, provide details of all such non-compliances:

During the FY 2023-24, there have been no instances of non-compliance with any prevailing or applicable environmental law/ regulations/guidelines in India.

Principle 7: Businesses, when engaging in influencing public and regulatory policy, should do so in a manner that is responsible and transparent.**Essential Indicators****1. a. Number of affiliations with trade and industry chambers/ associations.**

The Company has affiliations with 6 (six) national and state level trade and industry associations/ chambers.

b. List the top 10 trade and industry chambers/ associations (determined based on the total members of such body) the entity is a member of/ affiliated to.

Sr. No.	Name of the trade and industry chambers/ associations	Reach of trade and industry chambers/ associations (State/National)
1	Gujarat Chamber of Commerce & Industry	State
2	Bombay Chamber of Commerce & Industry	State
3	Ahmedabad Management Association	State
4	Process Plant & Machinery Association of India	National
5	Federation of Industries of India	National
6	Federation of Kutch Industries Association	State

2. Provide details of corrective action taken or underway on any issues related to anti-competitive conduct by the entity, based on adverse orders from regulatory authorities.

During the FY 2023-24, no adverse orders from any regulatory authorities have been received in relation anti-competitive conduct.

Principle 8: Businesses should promote inclusive growth and equitable development**Essential Indicators****1. Details of Social Impact Assessments (SIA) of projects undertaken by the entity based on applicable laws, in the current financial year.**

Not Applicable. During the FY 2023-24, there has been no requirement for the Company to conduct any SIA.

2. Provide information on project(s) for which ongoing Rehabilitation and Resettlement (R&R) is being undertaken by your entity, in the following format:

Not Applicable. During the FY 2023-24, there have been no projects undertaken by the Company which have required any Rehabilitation & Resettlement of any local communities.

3. Describe the mechanisms to receive and redress grievances of the community.

The Company treats the communities around its plant operations as equal partners in development. The Company engages with the communities on an ongoing basis. The communities have access to grievance redressal in case of any issues/complaints using the mechanism prescribed under the Whistle-Blower policy. Necessary actions will be taken by the stakeholder point of contact. In case if the community member is unhappy with the resolution provided, there is provision to escalate the issue to the VP HR and MD and engage in mediation/arbitration.

4. Percentage of input material (inputs to total inputs by value) sourced from suppliers:

Particulars	FY 2023-24	FY 2022-23
Directly sourced from MSMEs/ small producers		
Directly from India		Refer Note

The business operations of the Company are such that majority of the key inputs/ raw material (e.g. steel sheets, steel bars) which comprise a significant portion of the total procurement are required to be sourced from large Indian and global multinationals.

The Company sources ancillary products, equipment and other services required as part of its operations from MSMEs/small producers and from suppliers within the same or neighbouring districts in India.

5. Job creation in smaller towns – Disclose wages paid to persons employed (including employees or workers employed on a permanent or non-permanent / on contract basis) in the following locations, as % of total wage cost.

Location	FY 2023-24	FY 2022-23
Rural	85.27%	83.50%
Semi-urban	-	-
Urban	12.46%	14.10%
Metropolitan	2.27%	2.40%

Principle 9: Businesses should engage with and provide value to their consumers in a responsible manner

Essential Indicators

1. Describe the mechanisms in place to receive and respond to consumer complaints and feedback.

The Company has well established customer complaint handling standard operating procedures. Given the B2B focus, all customer complaints & feedback are initially received by the sales teams. Depending on the nature of the complaints/feedback, they are escalated to the relevant functional teams. The Company strives to resolve customer complaints within the time bound manner as per the defined technical and quality procedures.

All complaints are recorded, and proactive efforts are made to ensure any issues identified as part of the customer complaints/feedback are addressed to avoid similar issues arising in the future.

2. Turnover of products and/ services as a percentage of turnover from all products/service that carry information about:

Particulars	As a percentage to total turnover
Environmental and social parameters relevant to the product	NA
Safe and responsible usage	NA
Recycling and/or safe disposal	NA

Given the nature of the B2B products, this is not applicable to the Company.

3. Number of consumer complaints in respect of the following:

Particulars	FY 2023-24			FY 2022-23		
	Received during the year	Pending resolution at end of year	Remarks	Received during the year	Pending resolution at end of year	Remarks
Data privacy						
Advertising						
Cyber-security						
Delivery of essential services			Not Applicable			
Restrictive Trade Practices						
Unfair Trade Practices						
Other						

During the FY 2023-24, there have been no complaints from customers across any parameters.

4. Details of instances of product recalls on account of safety issues:

	Number	Reason for Call
Voluntary recalls	NA	NA
Forced recalls	NA	NA

During the FY 2023-24, there have been no instances of product recalls on account of safety/quality issues.

5. Does the entity have a framework/ policy on cyber security and risks related to data privacy? (Yes/No) If available, provide a web-link of the policy.

Yes, the Company has a robust framework and established processes for cyber security and data privacy. A dedicated IT team is responsible for implementation and assessment of the end-to-end operations for any vulnerabilities. Continuous back-up of all Company data is undertaken to avoid any disruption from cyber security risks. Through ongoing monitoring and robust IT controls, the Company proactively implements measures to mitigate any cyber security and data privacy risks.

The Company has ensured that all critical business applications are hosted on Tier IV data centre, which is managed by industry experts. In addition, it has set up Disaster Recovery sites in different seismic zones. The Company has institutionalised various preventive measures including cyber security assessment from time to time, by a third party of repute.

6. Provide details of any corrective actions taken or underway on issues relating to advertising, and delivery of essential services; cyber security and data privacy of customers; re-occurrence of instances of product recalls; penalty / action taken by regulatory authorities on safety of products / services.

During the FY 2023-24, there have been no issues to advertising, and delivery of essential services; cyber security and data privacy of customers; re-occurrence of instances of product recalls. No penalty/action have been taken by any regulatory authorities on these matters.

7. Provide the following information relating to data breaches:

	FY 2023-24	FY 2022-23
a. Number of instances of data breaches		
b. Percentage of data breaches involving personally identifiable information of customers		NIL
c. Impact, if any, of the data breaches		

During the FY 2023-24, there have no instances of data breaches at the Company.
